during the war absolutely no family starved there was even enough extra to be sold in the market and also to be sent to feed the whole British army fighting abroad So just imagine that every family decided that even if it was living in a city or far away from wide open spaces and farm area they could grow their own vegetables right there in their suburban houses on their terraces balconies or even in their kitchens It is surprising to know that by World War II even though Britain was still very much in the habit of making victory gardens to feed its people and its army other countries in the West did not follow this very sensible idea of growing your own food One wonders why However today you can consider yourself on just such an emergency footing With the world's economic condition being what it is and not many people bothering much about working their lands to grow food no wonder they would rather eat unhealthy food which they buy wholesale in tins and cans rather than eat healthy nourishing food Canning your own food to preserve it has been done all over the world for millenniums So why are we buying foodstuffs in cans and tins full of artificial preservatives fresh off supermarket shelves I remember a friend of mine visiting a country which had been hard hit by the Great Depression of 2004 She was surprised to see many people of the city just getting depressed because they had lost their jobs and they expected their government to spoonfeed them and give them money for food and clothing She said why do not the states put these people to work on land and help them grow food doing something useful for a change instead of just sitting by the side of the road in a self pitying binge I told her that that was not the culture in this particular society People were used to having other people take on the responsibilities since childhood and they were not willing to take on any responsibility on their own or do anything on their own initiative because all of that meant going out and working

Grow Your Own Fruit and Vegetables Lawrence D. Hills, 2011-10-06 *Grow Your Own Fruit and Vegetables* is Lawrence D. Hills's ground-breaking book on all aspects of fruit and vegetable growing. It was widely praised on its publication and remains a classic text in the world of organic gardening. Its great merit is that one feels that every operation described has been personally carried out by the author and selected as the most satisfactory after due consideration of traditional methods. The treatment of each plant is described from start to finish with sense, relish and humour. There are many fascinating analyses of vitamin and mineral contents and nutritional values of different vegetables and fruits, and there is excellent advice on picking, harvesting as well as on cooking. It is the best practical guide to the subject that has appeared for years, and the author is not concerned with argument or philosophy, only with growing produce well. *Country Life*: There is no better guide to non-chemical gardening than Lawrence D. Hills. He is exceptionally well-read and a good practical gardener. Into the bargain, not a very common combination, and no doubt because of his wide-ranging knowledge, he is more balanced in his views than some advocates of all organic gardening. Where I find Mr. Hills most stimulating is in his highly personal approach to fruit and vegetable varieties and his recommendations based on such commercially unfashionable criteria as flavour and food value. There is a wealth of information here which would be difficult to find in any other single book. A. G. L. Hellyer in the *Financial Times*.
