B. Combs,1976 [Home Vegetable Gardening: A Complete and Practical Guide to the Planting and Care of All Vegetables, Fruits and Berries Worth Growing for Home Use](#) Frederick Frye Rockwell,1911-01-01 Formerly it was the custom for gardeners to invest their labors and achievements with a mystery and secrecy which might well have discouraged any amateur from trespassing upon such difficult ground Trade secrets in either flower or vegetable growing were acquired by the apprentice only through practice and observation and in turn jealously guarded by him until passed on to some younger brother in the profession Every garden operation was made to seem a wonderful and difficult undertaking Now all that has changed In fact the pendulum has swung as it usually does to the other extreme Often if you are a beginner you have been flatteringly told in print that you could from the beginning do just as well as the experienced gardener My garden friend it cannot as a usual thing be done Of course it may happen and sometimes does You might being a trusting lamb go down into Wall Street with 10 000 Ed Note all monetary values throughout the book are 1911 values and make a fortune You know that you would not be likely to the chances are very much against you This garden business is a matter of common sense and the man or the woman who has learned by experience how to do a thing whether it is cornering the market or growing cabbages naturally does it better than the one who has not Do not expect the impossible If you do read a poultry advertisement and go into the hen business instead of trying to garden I have grown pumpkins that necessitated the tearing down of the fence in order to get them out of the lot and sometimes though not frequently have had to use the axe to cut through a stalk of asparagus but I never made 17 000 in ten months from an eggplant in a city back yard No if you are going to take up gardening you will have to work and you will

have a great many disappointments All that I or anyone else could put between the two covers of a book will not make a gardener of you It must be learned through the fingers and back too as well as from the printed page But after all the greatest reward for your efforts will be the work itself and unless you love the work or have a feeling that you will love it probably the best way for you is to stick to the grocer for your garden Most things in the course of development change from the simple to the complex The art of gardening has in many ways been an exception to the rule The methods of culture used for many crops are more simple than those in vogue a generation ago The last fifty years has seen also a tremendous advance in the varieties of vegetables and the strange thing is that in many instances the new and better sorts are more easily and quickly grown than those they have replaced The new lima beans are an instance of what is meant While limas have always been appreciated as one of the most delicious of vegetables in many sections they could never be successfully grown because of their aversion to dampness and cold and of the long season required to mature them The newer sorts are not only larger and better but hardier and earlier and the bush forms have made them still more generally available
