 Introduction There are far too many people out there who are under the impression that you cannot have a beautiful garden
 without spending huge amounts of money That is so not true A little bit of planning and this fallacy is going to fall to pieces
 by the wayside Those who are grown annuals for years are going to give this statement the lie gladly Their initial investment
 must have been just a packet of seeds The next year the plants were grown from the seeds collected from the previous years
 crop Do not forget that the life of an annual is limited to just 12 months and so you must not expect them to grow up and
 bloom again the next year unless of course you allowed the seeds to lie in the bed without collecting them That is when they
 are going to bloom up just like weeds with a little bit of rain and with the coming of the spring One of the great advantages of
 annuals is that they are quite easy to grow and flourish in your garden over a long period The most common are well known
 to even amateur gardeners who can recognize a cornflower nasturtiums Virginia stock and Candytuft These are very
 beautiful in themselves but every gardener is growing them in his garden **Gardeners' Chronicle of America** ,1912
