**GPRS Networks** Geoff Sanders, Lionel Thorens, Manfred Reisky, Oliver Rulik, Stefan Deylitz, 2004-01-09 GPRS is a packet based wireless communication service that offers data rates from 9.05 up to 171.2 Kbps and continuous connection to the Internet for mobile phone and computer users GPRS is based on GSM communications and complements existing services such as circuit switched cellular phone connections and the Short Message Service SMS GPRS represents the bridge between 2G and 3G mobile telecommunications and is commonly referred to as 2.5G Implementation of GPRS requires modification of the existing GSM networks in that GSM is a circuit switched technology while GPRS is packet oriented GPRS enables packet data the same as is used by an Ethernet LAN WAN or the Internet to be sent to and from a mobile station e.g. mobile phone PDA or Laptop WAP and SMS can also be sent using GPRS and individuals working with GPRS need to learn and understand how the mobile stations the air interface network architecture protocol structures and signalling procedures must be modified GPRS offers much higher data rates than GSM and can be combined with 3G technologies such as EDGE to give even higher bit rates It offers many benefits for customers and network operators such as volume rather than time dependent billing and more efficient use of network resources Due to the worldwide delay in implementing 3G solutions such as CDMA and UMTS the demand for GPRS is still growing GPRS Networks Offers detailed information ranging from standards to practical implementation Answers how and why rather than just simply re-stating GPRS specifications Provides comprehensive coverage in a single volume Essential reading for all telecommunications project managers field engineers technical staff in network operator and manufacturing organisations GPRS application and service developers Datacoms IT engineers The

comprehensive coverage also makes this a superb reference for students of computer science telecommunications and electrical engineering
