Guesstimation 2.0 Lawrence Weinstein, 2012-09-30 Simple and effective techniques for quickly estimating virtually anything Guesstimation 2 0 reveals the simple and effective techniques needed to estimate virtually anything quickly and illustrates them using an eclectic array of problems A stimulating follow up to Guesstimation this is the must have book for anyone preparing for a job interview in technology or finance where more and more leading businesses test applicants using estimation questions just like these The ability to guesstimate on your feet is an essential skill to have in today s world whether you re trying to distinguish between a billion dollar subsidy and a trillion dollar stimulus a megawatt wind turbine and a gigawatt nuclear plant or parts per million and parts per billion contaminants Lawrence Weinstein begins with a concise tutorial on how to solve these kinds of order of magnitude problems and then invites readers to have a go themselves The book features dozens of problems along with helpful hints and easy to understand solutions It also includes appendixes containing useful formulas and more Guesstimation 2 0 shows how to estimate everything from how closely you can orbit a neutron star without being pulled apart by gravity to the fuel used to transport your food from the farm to the store to the total length of all toilet paper used in the United States It also enables readers to answer once and for all the most asked environmental question of our day paper or plastic

HHAI 2023: Augmenting Human Intellect Paul Lukowicz, Sven Mayer, Janin Koch, John Shawe-Taylor, 2023-07-15 Artificial intelligence AI has been much in the news recently with some commentators expressing concern that AI might eventually replace humans But many developments in AI are designed to enhance and supplement the performance of humans rather than replace them and a novel field of study with new approaches and solutions to the development of AI has arisen to focus on this aspect of the technology This book presents the proceedings of HHAI2023 the 2nd International Conference on Hybrid Human Artificial Intelligence held from 26-30 June 2023 in Munich Germany The HHAI international conference series is focused on the study of artificially intelligent systems that cooperate synergistically proactively responsibly and purposefully with humans amplifying rather than replacing human intelligence and invites contributions from various fields including AI human computer interaction the cognitive and social sciences computer science philosophy among others A total of 78 submissions were received for the main conference track and most papers were reviewed by at least three reviewers The overall final acceptance rate was 43% with 14 contributions accepted as full papers 14 as working papers and 6 as extended abstracts The papers presented here cover topics including interactive hybrid agents hybrid intelligence for decision support hybrid intelligence for health and values such as fairness and trust in hybrid intelligence We further accepted 17 posters and 4 demos as well as 8 students to the first HHAI doctoral consortium this year The authors of 4 working papers and 2 doctoral consortium submissions opted for not publishing their submissions to allow a later full submission resulting in a total of 57 papers included in this proceedings Addressing all aspects of AI systems that assist humans and emphasizing the need for adaptive collaborative responsible interactive and

human centered artificial intelligence systems which can leverage human strengths and compensate for human weaknesses while considering social ethical and legal considerations the book will be of interest to all those working in the field **East European Transition and EU Enlargement** Wojciech W. Charemza, Krystyna Strzala, 2012-12-06 In March 1998 the European Union formally launched the accession process that will lead to a significant enlargement of the Union So far ten countries from Central Europe Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania the Slovak Republic and Slovenia have submitted their applications for EU membership This unique process immediately attracted attention of economists and policy makers Nevertheless it can be noticed that among numerous results already published there is a distinctive shortage of books and papers in which quantitative research methods are applied This is to a large extent justified by the fact that the transition and accession processes are new to the economic sciences their methodology is not well researched statistical data for the Central and East European countries are scarce and not always reliable and generally quantitative approach seems to be a risky and uncertain business All these all problems can also be seen as a challenge rather than an obstacle With this on mind we have decided to clarify the status quo by organising a research seminar which focused on the methodology and quantitative analysis of the Central and East European transition and pre accession processes The seminar East European Transition and EU Enlargement a Quantitative Approach organised by Macroeconomic and Financial Data Centre University of Gdansk and University of Leicester took place in Gdansk in June 2001 Our edited volume contains papers developed from this seminar **Blended Learning in Practice** Amanda G. Madden, Lauren Margulieux, Robert S. Kadel, Ashok K. Goel, 2019-04-09 A guide to both theory and practice of blended learning offering rigorous research case studies and methods for the assessment of educational effectiveness Blended learning combines traditional in person learning with technology enabled education Its pedagogical aim is to merge the scale asynchrony and flexibility of online learning with the benefits of the traditional classroom content rich instruction and the development of learning relationships This book offers a guide to both theory and practice of blended learning offering rigorous research case studies and methods for the assessment of educational effectiveness The contributors to this volume adopt a range of approaches to blended learning and different models of implementation and offer guidelines for both researchers and instructors considering such issues as research design and data collection In these courses instructors addressed problems they had noted in traditional classrooms attempting to enhance student engagement include more active learning strategies approximate real world problem solving and reach non majors The volume offers a cross section of approaches from one institution Georgia Tech to provide both depth and breadth It examines the methodologies of implementation in a variety of courses ranging from a first year composition class that incorporated the video game Assassin s Creed II to a research methods class for psychology and computer science students Blended Learning will be an essential resource for educators researchers administrators and policy makers Contributors Joe Bankoff Paula Braun Mark Braunstein
