**Research Methods in Spirituality and Contemplative Studies** Bernadette Flanagan, Kerri Clough, 2024-09-03 The Routledge Handbook of Research Methods in Spirituality and Contemplative Studies provides the first authoritative overview of methodology in this growing field. Against the background of the pandemic and other global challenges, spirituality is expanding as an agreed term with which to discuss the efforts people make to be fully present to deeper, invisible dimensions of their personal identity and external reality. But until now there have been few resources exploring the different methodological approaches researchers take. This book explores the primary methodologies emerging: First Person, Second Person, and Third Person, and provides a systematisation of spirituality research in applied contexts for the first time. Comprising 33 chapters by a team of international contributors, the book is divided into seven parts: Foundations; Approaches to Contemplative Research; Contemplative Research in Education; Contemplative Research in Work and Leadership; Contemplative Research in Science, Health, and Healing; Contemplative Research in Social Sciences; and the Way Forward. The Handbook provides readers, practitioners, and policymakers with methods and approaches which can facilitate a spiritual and contemplative stance in research activities. It is an essential resource for researchers and students of Religion, Spirituality, and Research Methods.

**Relational Mindfulness** Roberto Aristegui, Javier Garcia Campayo, Patricio Barriga, 2021-03-25 This book proposes a new approach to mindfulness based interventions presenting them not as individual but as relational practices In the last decades mindfulness has exerted a growing influence on many fields of research and activity but always as an individual practice The authors in this volume believe that the strong development of mindfulness today implies considering a dialogue between this individualistic approach and the perspective of relational mindfulness based on social constructionism The volume is organized in two parts The first part focuses on the theoretical foundations of relational mindfulness The second part presents possibilities of applications of relational mindfulness in clinical and organizational settings to promote mental health and personal development Relational Mindfulness Fundamentals and Applications will be of interest to a wide range of professionals interested in applying mindfulness based interventions in mental health care and productive organizations such as clinical and health psychologists public health professionals and human resources analysts and consultants among others It is true that the metaphor of mindfulness has been enormously fruitful in its invitation to innovate By removing meditative practices from their ancient roots practitioners were free to create practices especially relevant to context At the same time there was also a recognizable loss in the profoundly rich heritage that was left behind For many of us the greatest loss resulted from the absorption of such practices into Western individualism What had once been an orientation to practice emphasizing our fundamental inter being had become a gateway to silent separation It is in this context that the present volume bursts into significance With special appreciation to the editors of this book we are treated to a multi dimensional exploration into the relational dimensions of mindfulness practices Bringing ideas experience and wisdom from across professions and across continents the contributors open an exciting path to the future Excerpt from the Foreword by Kenneth J Gergen
