Developmental Social Cognitive Neuroscience Philip David Zelazo, Michael Chandler, Eveline Crone, 2016-07-22 This volume in the JPS Series is intended to help crystallize the emergence of a new field Developmental Social Cognitive Neuroscience aimed at elucidating the neural correlates of the development of socio emotional experience and behavior No one any longer doubts that infants are born with a biologically based head start in accomplishing their important life tasks genetic resources if you will that are exploited differently in different contexts Nevertheless it is also true that socially relevant neural functions develop slowly during childhood and that this development is owed to complex interactions among genes social and cultural environments and children s own behavior A key challenge lies in finding appropriate ways of describing these complex interactions and the way in which they unfold in real developmental time This is the challenge that motivates research in developmental social cognitive neuroscience The
