eBay Success Secrets Robert Corrigan,2014-03-13

Here is some BAD news first trying to make money on eBay selling Brand Name products is NOT the way to make money Here s why even if you could manage to locate a source of genuine products you would have to spend 1 000 s just to get enough discount to make even a small profit You see there are just too many sellers competing for the same business Brand name products are just too expensive to buy the margins are slim and there is too much competition There must be an easier way to make money Well there is the market for non branded and private label products on eBay is huge and this approach works in any market it costs a tiny amount to set up and the profit margins are outrageous and it is much easier than most people would believe In this comprehensive book I show you step by step how to build your own eBay empire selling Private Label and Non Branded stock The profit margins on private label products and non branded products are massive The Advantage Of Private Label Products Are No one can directly compete with you as you own the brand Your customers will know where you sourced product from Private labelling is widespread across many industry sectors as is none branded products Small minimum orders allow us to test products for a tiny risk You can build an entire business using Private Label Non Branded Products Compete with household name products at a fraction of the price of stocking branded items You are almost always dealing directly with the manufacturer so no wholesalers cut As no one is selling exactly the same product as yourself and no one will know where you bought it from you can sell at your own price I even provide a list of Private Label Suppliers and Manufacturers who stock a massive range of product that you can sell in multiple niche markets these are the exact same sources I use in my eBay businesses This is your COMPLETE blueprint to building your own profitable eBay business on a shoestring and making outrageous profits
