Lost In The Museum Buried Treasures And The Stories They Tell:

Lost in the Museum Nancy Moses, 2008 Few beyond the insider realize that museums own millions of objects the public never sees In *Lost in the Museum* Nancy Moses takes the reader behind the employees only doors to uncover the stories buried along with the objects in the crypts of museums historical societies and archives Weaving the stories of the object its original owner and the often idiosyncratic institution where the object resides the book reveals the darkest secret of the cultural world the precarious balance of art culture and politics that keep items for decades lost in the museum **Bone Rooms**

Samuel J. Redman, 2016-03-14 In the bone rooms of the Smithsonian Institution and other museums in the late nineteenth century a scientific revolution was unfolding as collectors engaged in a global competition to recover the best human skeletons mummies fossils Study of these remains led to the discrediting of racial theory and the search for human origins and evolution **Starting Right: A Basic Guide to Museum Planning** Gerald George, Carol

art and science are labels with specific powers to order social worlds and that art and science are best understood as networks that produce knowledge Rogers shows through a series of cases the similarities and overlapping practices of these knowledge communities The cases which range from nineteenth century artisans to contemporary bioartists illustrate how art can provide the basis for a new subdiscipline called art science and technology studies ASTS offering hybrid tools for investigating art science collaborations Rogers s subjects include the work of father and son glassblowers the Blaschkas whose glass models produced in the nineteenth century for use in biological classification are now displayed as works of art the physics photographs of documentary photographer Berenice Abbott and a bioart lab that produces work functioning as both artwork and scientific output Finally Rogers an STS scholar and contemporary art science curator draws on her own work to consider the concept of curation as a form of critical analysis
