Advances in Structural Mechanics and Applications José António Fonseca de Oliveira Correia,Satyabrata Choudhury,Subhrajit Dutta,2022-06-07 The proceedings of the conference is going to benefit the researchers academicians students and professionals in getting enlightened on latest technologies on structural mechanics structure and infrastructure engineering Further work on practical applications of developed scientific methodologies to civil structural engineering will make the proceedings more interesting and useful to practicing engineers and structural designers

Smart Energy Practices for a Sustainable World Nina S. Godbole ,John P. Lamb ,2023-06-13 Mankind has scaled unprecedented growth since the advent of the Industrial Revolution However this progress has come at the hefty cost of environmental degradation Climate change undeniably is one of the biggest challenges of the planet Earth and is largely anthropogenic In the modern world context the phenomenon of climate change is one of the most defining issues when it comes to realizing objectives of the Sustainable Development Goals SDGs Climate change is not limited to geographical boundaries it is a global problem hence requires global solutions It has been widely discussed and therefore has acquired centre stage across the major world forums Smart Energy Practices for a Sustainable World how we all can contribute stresses the need for us to judiciously sustainably and smartly harness and use energy techniques in order to effectively combat climate change The book also gives an in depth discussion on utilization of artificial intelligence and information technology to realize energy efficiency in various sectors of economy including but not

limited to transportation buildings infrastructure health care and other services Text is supplemented by case studies that depict ground level reality to facilitate comprehension of the subject matter The appendices serve as an extended learning of the concepts discussed in the chapters The publication would serve as a valuable reference for both scholars and researchers engaged in the domain in addition to being a guide to industry as well as the academic world Table of Contents 1 Smart Sustainable and Green the mantra to save our planet 2 Smart Energy Systems and Components 3 Energy Production and Delivery 4 Impact of Electronic Equipment on Energy Use and Carbon Footprint 5 Standard Energy Use and Carbon Footprint Metrics 6 Smart Buildings planning and construction 7 Transport smarter commuting and energy efficient mobility 8 Electronic Commerce and Other Digital Services for Smart Planet 9 Sustainable Practices for Green Health Care Services 10 Knowledge and Behaviour for a Smart Planet 11 Energy Audits 12 Worldwide Case Studies for Green Practices 13 The Future for Energy Use in Our Planet Appendices

GRIHA for Existing Buildings: Transforming existing buildings to sustainable buildings (Version 1: Detailed Manual) A GRIHA Council Publication ,2022-03-10 GRIHA for Existing Buildings rating is an integrated green building rating tool to evaluate the performance of existing buildings and provide solutions for enhanced energy and water efficiency increased thermal visual comfort and decreased operational maintenance costs While focusing on the above the tool has been developed with the underlying objectives of simplicity of execution economic viability and alignment with national and international codes and standards The rating endeavours to cover various categories of buildings across diverse climatic zones of the country The rating system is a 100 point system consisting of 12 criteria categorized under seven sections such as Site Parameters Maintenance Housekeeping Energy Water Human Health Comfort and Social Aspects The minimum points required for certification is 25 Contents SECTION I SITE PARAMETERS Criterion 1 Accessibility to Basic Services Criterion 2 Microclimatic Impact SECTION II MAINTENANCE AND HOUSEKEEPING Criterion 3 Maintenance Green Procurement and Waste Management Criterion 4 Metering and Monitoring SECTION III ENERGY Criterion 5 Energy Efficiency Criterion 6 Renewable Energy Utilization SECTION IV WATER EFFICIENCY Criterion 7 Water Footprint Criterion 8 Reduction in Cumulative Water Performance SECTION V OCCUPANT HEALTH AND COMFORT Criterion 9 Achieving Indoor Comfort Requirements Thermal Visual And Acoustic Criterion 10 Maintaining Good IAQ SECTION VI SOCIAL ASPECTS Criterion 11 Universal Accessibility and Environmental Awareness SECTION VII BONUS POINTS Criterion 12 Bonus Points USER GUIDE Appendices

Sustainability Assessment of Built Environment Gopal Alapure,Abraham George,2025-02-18 This book focuses on developing a holistic sustainability assessment model for built environment that can help in identifying sustainability issues and parameters for the built environment It covers a wide range of sustainable built form issues in the local and regional contexts The volume identifies significant built form sustainability indicators criteria and sub criterion while highlighting the importance of incorporating sustainability principles and assessment of sustainability It also discusses the data collection process for defining priorities of

sustainability parameters using the Analytic Hierarchy Process AHP technique The book presents information to obtain fuzzy weights to classify assessed built form The chapters in this book explain the development of an integrated built environment assessment system for infrastructure projects This book will be of interest to students teachers and researchers of planning architecture construction urban studies interior designing urban planning and civil engineering It will also be useful for architects planners civil engineers interior designers builders developers green building assessors and those interested in the sustainable assessment built environment and urban development *GRIHA Manual: Technical manual for trainers on water and waste management sustainable building materials health and well-being of building occupants, building operation and maintenance* ,2011 **Digital Cities Roadmap** Arun Solanki,Adarsh Kumar,Anand Nayyar,2021-04-13 DIGITAL CITIES ROADMAP This book details applications of technology to efficient digital city infrastructure and its planning including smart buildings Rapid urbanization demographic changes environmental changes and new technologies are changing the views of urban leaders on sustainability as well as creating and providing public services to tackle these new dynamics Sustainable development is an objective by which the processes of planning implementing projects and development is aimed at meeting the needs of modern communities without compromising the potential of future generations The advent of Smart Cities is the answer to these problems Digital Cities Roadmap provides an in depth analysis of design technologies that lay a solid foundation for sustainable buildings The book also highlights smart automation technologies that help save energy as well as various performance indicators needed to make construction easier The book aims to create a strong research community to have a deep understanding and the latest knowledge in the field of energy and comfort to offer solid ideas in the nearby future for sustainable and resilient buildings These buildings will help the city grow as a smart city The smart city has also a focus on low energy consumption renewable energy and a small carbon footprint Audience The information provided in this book will be of value to researchers academicians and industry professionals interested in IoT based architecture and sustainable buildings energy efficiency and various tools and methods used to develop green technologies for construction in smart cities *Manual of the Administration of the Madras Presidency, in Illustration of the Records of Government & the Yearly Administration Reports* Madras (India : Presidency),1885 **THE TALKIES PRECEPT** Rishabh Anand,Bhavya Shekhawat ,2021-03-17 After reading the book one will have a understanding to design a building which is sustainable in all aspects from the building form and concept to the assemblies of new and different materials especially a building that has the area requirement more similar to an institutional building This book also includes some case studies that were used for references related to sustainable designs We can also say that after having a look at this book one can have a brief understanding of the architectural simulation softwares used for radiation analysis thermal comfort or analysis related to assemblies of materials etc As the book is all about different sustainable projects which are very different in all aspects followed from the start to the end Advances in Energy and Environment Rafid Al Khaddar,N. D. Kaushika,S.K. Singh,R. K.

Tomar,2021-04-20 This book comprises select papers presented at the International Conference on Trends and Recent Advances in Civil Engineering TRACE 2020 This book covers papers on contemporary renewable energy and environmental technologies which include water purification water distribution network use of solar energy for electricity production waste management greening of buildings and air quality analysis In all twenty three papers have been selected for publication It is believed that this book will be useful to a fairly wide spectrum of audience like researchers application engineers and industry managers

Sustainable Resilient Built Environments Rama Devi Nandineni,Susan Ang,Norwina Binti Mohd Nawawi,2024-07-05 The proceedings of Sustainable Resilient Built Environments are based on the SRBE 2022 conference held in December 2022 It focuses on the advances under the overarching theme of Sustainability The concept of Sustainability has been conventionally defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs In scientific literature sustainable development has been analysed using different qualitative approaches such as economic social ecological cultural institutional ethical and political In this edited volume the concepts of both sustainability and resilience are considered to open up useful pathways towards achieving sustainable buildings and infrastructure Though the concepts of sustainability and resilience are considered to help improve the built environment the interrelations and interdependence between these two concepts are not clearly evident This has led to the questions such as Is the sustainable built environment always resilient Is the resilient built environment always sustainable What more is needed for sustainability In exploring these pertinent questions the proposed edited volume is expected to unveil and disseminate new insights on the themes related to sustainable and resilient built environment The themes of the proceedings lay a platform for researchers and professionals to integrate the aspects including smart innovation technologies green energy efficiency carbon reduction sustainability and resilience with regard to buildings and other built infrastructure Specific objectives included as per the five themes are as follows Environment Design and Sustainability Sustainable Smart Buildings Community Resilience Social Sustainability Heritage and Sustainability Pandemic issues and sustainable development
