Humphreys, 2006 A comprehensive treatment of the representation theory of finite

groups of Lie type over a field of the defining prime characteristic Fundamentals of Hyperbolic Manifolds Richard Douglas Canary, Albert Marden, D. B. A. Epstein, 2006-04-13 Presents reissued articles from two classic sources on hyperbolic manifolds Part I is an exposition of Chapters 8 and 9 of Thurston's pioneering Princeton Notes there is a new introduction describing recent advances with an up to date bibliography giving a contemporary context in which the work can be set Part II expounds the theory of convex hull boundaries and their bending laminations A new appendix describes recent work Part III is Thurston's famous paper that presents the notion of earthquakes in hyperbolic geometry and proves the earthquake theorem The final part introduces the theory of measures on the limit set drawing attention to related ergodic theory and the exponent of convergence The book will be welcomed by graduate students and professional mathematicians who want a rigorous introduction to some basic tools essential for the modern theory of hyperbolic manifolds General Theory of Lie Groupoids and Lie Algebroids Kirill C. H. Mackenzie, 2005-06-09 This a comprehensive modern account of the theory of Lie groupoids and Lie algebroids and their importance in differential geometry in particular their relations with Poisson geometry and general connection theory It covers much work done since the mid 1980s including the first treatment in book form of Poisson groupoids Lie bialgebroids and double vector bundles As such this book will be of great interest to all those working in or wishing to learn the modern theory of Lie groupoids and Lie algebroids **Geometric Mechanics and Symmetry** James Montaldi, Tudor Ratiu, 2005-05-05 The lectures in this 2005 book are intended to bring young researchers to the current frontier of knowledge in geometrical mechanics and dynamical systems Finite Geometries, Groups, and **Computation** Alexander Hulpke, Robert Liebler, Tim Penttila, Akos Seress, 2008-08-22 This volume is the proceedings of a conference on Finite Geometries Groups and Computation that took place on September 4 9 2004 at Pingree Park Colorado a campus of Colorado State University Not accidentally the conference coincided with the 60th birthday of William Kantor and the topics relate to his major research areas Participants were encouraged to explore the deeper interplay between these fields The survey papers by Kantor O Brien and Penttila should serve to introduce both students and the broader mathematical community to these important topics and some of their connections while the volume as a whole gives an overview of current developments in these fields Higher Operads, Higher Categories Tom Leinster, 2004-07-22 Foundations of higher dimensional category theory for graduate students and researchers in mathematics and mathematical Applications of Group Theory to Combinatorics Jack Koolen, Jin Ho Kwak, Ming-Yao Xu, 2008-07-02 Applications of physics Group Theory to Combinatorics contains 11 survey papers from international experts in combinatorics group theory and combinatorial topology The contributions cover topics from quite a diverse spectrum such as design theory Belyi functions group theory transitive graphs regular maps and Hurwitz problems and present the state Surveys in Modern algebraic geometry dynamics through to number theory and quantum groups Model Theory with Applications to Algebra
