Grundlagen Entwicklung Architektur Vortrage Kunstgewerbemuseum:

Grundlagen & [i.e. und] Entwicklung der Architektur Hendrik Petrus Berlage, 1908 History of Architectural Theory Hanno-Walter Kruft, 1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Kruft has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive **Bruno Taut's Design Inspiration for the Glashaus** David Nielsen, 2015-09-16 As a formative exemplar of early architectural modernism Bruno Taut's seminal exhibition pavilion the Glashaus literally translated Glasshouse is logically part of the important debate of rethinking the origins of modernism However the historical record of Bruno Taut's Glashaus has been primarily established by one art historian and critic As a result the historical record of the Glashaus is significantly skewed toward a singular notion of Expressionism and surprisingly excludes Taut's diverse motives for the design of the building In an effort to clarify the problematic historical record of the Glashaus this book exposes Bruno Taut's motives and inspirations for its design The result is that Taut's motives can be found in yet unacknowledged precedents like the botanical inspiration of the Victoria regia lily the commercial interests of Frederick Keppler as the Director of the Deutsche Luxfer Prismen Syndikat and imitation that derived openly from the Gothic The outcome is a substantial contribution to the re-evaluation of the generally accepted histories of the modern movement in architecture Hendrik Petrus Berlage Hendrik Petrus Berlage, 1996-01-01 Hendrik Petrus Berlage the Dutch architect and architectural philosopher created a series of buildings and a body of writings from 1886 to 1909 that were among the first efforts to probe the problems and possibilities of modernism Although his Amsterdam Stock Exchange with its rational mastery of materials and space has long been celebrated for its seminal influence on the architecture of the 20th century Berlage's writings are highlighted here Bringing together Berlage's most important texts among them *Thoughts on Style in Architecture* *Architecture's Place in Modern Aesthetics* and *Art and Society* this volume presents a chapter in the history of European modernism In his introduction Iain Boyd Whyte demonstrates that the substantial contribution of Berlage's designs to modern architecture cannot be fully appreciated without an understanding of the aesthetic principles first laid out in his writings Ways to Study and Research Urban, Architectural and Technical Design T.M. de Jong, D.J.M. van der Voordt, 2005-12-31 How can we develop a scientific basis for architectural urban and technical design When can a design be labelled as scientific output comparable with a scientific report What are the similarities and dissimilarities between design and empirical research and between design research typological research design study and study by design Is there a need for a particular methodology for design driven study and research With these questions in mind more than forty members of the Faculty of Architecture of the Delft University of Technology have described their ways of study and research Each

chapter shows the objectives the methodology and its implementation in search for a deeper knowledge of design processes and an optimal quality of the design itself The authors among them architects urban planners social scientists lawyers technicians and information scientists have widely differing backgrounds Nevertheless they share a great deal The central focus is a better understanding of design processes design tools and the effects of design interventions on issues such as utility aesthetics meaning sustainability and feasibility

Toward an Architecture Le Corbusier, 2007 Published in 1923 *Toward an Architecture* had an immediate impact on architects throughout Europe and remains a foundational text for students and professionals Le Corbusier urges readers to cease thinking of architecture as a matter of historical styles and instead open their eyes to the modern world Simultaneously a historian critic and prophet he provocatively juxtaposes views of classical Greece and Renaissance Rome with images of airplanes cars and ocean liners Le Corbusier's slogans such as the house is a machine for living in and philosophy changed how his contemporaries saw the relationship between architecture technology and history This edition includes a new translation of the original text a scholarly introduction and background notes that illuminate the text and illustrations

Grounds and Envelopes Michael U. Hensel, Jeffrey P. Turko, 2015-05-22 Providing a source of vision for the revitalisation of ground and envelope as spatial elements that can inform the search for embedded locally specific architectures this book collects essays and projects that each contributes a particular element to what might constitute an integrated and richly nuanced approach to spatial organisation Projects include Paulo Mendes da Rocha Brazilian Pavilion Osaka World Expo 1970 Osaka Japan RCR Arquitectes Marquee at Les Cols Restaurant Olot Girona Spain Weiss Manfredi Seattle Art Museum Olympic Sculpture Park Seattle Washington USA Peter Eisenman City of Culture of Galicia Santiago de Compostela Spain Plasma Studio and Groundlab Xi'an Horticultural Expo Longgang China Foreign Office Architects Yokohama International Ferry Terminal Yokohama Japan Nekton Design Turf City Reykjavik Iceland Alvaro Siza Swimming Pool Leiria da Palmeira Portugal Eduardo Souto de Moura Braga Municipal Stadium Braga Portugal MVRDV Villa VPRO Hilversum Netherlands Bernard Tschumi Le Fresnoy Art Centre Tourcoing France OCEAN World Centre for Human Concerns New York City USA R Spidernethewood Nîmes France Toyo Ito Serpentine Pavilion London England Enric Miralles and Carme Pinós Olympic Archery Range Barcelona Spain Kengo Kuma GC Prostho Museum Research Centre Aichi Prefecture Japan Cloud 9 MediaTic Barcelona Spain Diller Scofidio and Renfro Blur Building Yverdon les Bains Switzerland Swiss National Expo With an abundance of built and unbuilt key projects available it is now possible to outline the contours of a new discourse This book initiates a new beginning in this direction so that architecture can partake in the creation of heterogeneous space and culturally socially and environmentally sustainable built environments

Mies van der Rohe im Diskurs Kerstin Plüm, 2014-03-15 Die Arbeiten von Mies van der Rohe haben bis heute nicht an Aktualität verloren Dieser Band versammelt Beiträge die würdigend auf die Arbeiten des Architekten blicken und sich auf innovative Weise mit ihm auseinandersetzen Hierbei erweitern die Autoren mit ihren Positionen bestehende Forschungsansätze und greifen Fragen der

Entwurfstechnik und der Rezeptionsästhetik auf darüber hinaus deuten sie Mies van der Rohe als Medienstrategen umreißen seine Tätigkeit für die Industrie und projizieren seine Impulse auf Folgegenerationen. Der Diskurs der von etablierten Forschern bis hin zu Nachwuchswissenschaftlern geführt wird erstreckt sich über Philosophie, Bildende Kunst, Architekturtheorie sowie Kunst und Mediengeschichte.

Tobias Teutenberg zeigt, die Ursprünge dieses Regimes liegen in der Anschauungs- und Zeichenpädagogik, wo Didaktiker wie Johann Heinrich Pestalozzi auf mathematischer Grundlage normative Methoden zur Systematisierung des Sehens entwickelten. Durch Publikationen und Atlanten verbreitete sich der pädagogische Wahrnehmungsstil weitreichend. Er fand nicht nur Eingang in die Bildungssysteme der Zeit, sondern auch in die Kunstgeschichte, Psychologie und bildende Kunst.
