Guastavino Vaulting The Art Of Structural Tile:

Guastavino Vaulting John Ochsendorf, 2013-09-17 The first monograph to celebrate the architectural legacy of the Guastavino family is now available in paperback First generation Spanish immigrants Rafael Guastavino and his son Rafael Jr oversaw the construction of thousands of spectacular tile vaults across the United States between the 1880s and the 1950s These versatile strong and fireproof vaults were built by Guastavino in more than two hundred major buildings in Manhattan and in hundreds more across the country including Grand Central Terminal Carnegie Hall the Biltmore Estate the Cathedral of St John the Divine the Registry Room at Ellis Island and many major university buildings *Guastavino Vaulting* blends a scholarly history of the technology with archival images drawings and stunning photographs that illustrate the variety and endurance of this building method

Guastavino Vaulting John Allen Ochsendorf, 2010 **The Art of Vaulting** Paula Fuentes, Anke Wunderwald, 2019-05-06 Some of the highest and widest vault constructions produced in the Middle Ages are located in the Mediterranean area Outstanding buildings with remarkable vaults and buttressing such as the Cathedral of Majorca are evidence of a lively technology transfer and contemporary developments International experts trace the complex processes of Medieval design and construction They research structural patterns in the processes involved analyze building methods and relate their findings to historic documents The approach of combining field research with the study of literary sources provides a fresh look at the impressive monuments and shines new light on technological advances and construction technology of the time

Las bovedas de Guastavino Ochsendorf, 2022-02-16 Cada a o millones de personas pasan bajo las b vedas tabicadas de Guastavino en espacios hist ricos de todos los Estados Unidos desde la Sala de Registro de Ellis Island 1917 hasta el Biltmore Estate en las monta as de Carolina del Norte 1895 y desde el Capitolio del Estado de Nebraska 1932 en Lincoln hasta los e dificios del campus de la Universidad Carnegie Mellon de Pittsburgh 1912 Sin embargo son pocos los visitantes que aprecian la aportaci n de la familia valenciana Guastavino a la arquitectura estadounidense y las condiciones que propiciaron que las b vedas tabicadas de Guastavino fueran durante d cadas uno de los sistemas estructurales preferidos

Restaurants and Dining Rooms Franziska Bollerey, Christoph Grafe, 2019-03-26 According to urban academic myth the first restaurants emerged in the wake of the French Revolution From the very beginning in the elegant salons of the latter days of the Ancien R gime the design of restaurants has been closely related to ideas of how food should be presented and how it may be consumed in public The appearance and atmosphere created by restaurant owners reflects culturally embedded ideals of comfort sociability and the good life As a product of the modern metropolis the restaurant encapsulates and illustrates the profound change in how its patrons viewed themselves as individuals how they used their cities and how they met friends or business partners over a meal The architectural design of environments for the consumption of food necessarily involves an exploration and a manipulation of the human experience of space It reflects ideas about public and private behaviour for which the restaurant offers a stage Famous architects were commissioned to provide designs for restaurants in order to lure in an ever more demanding urban clientele The interior designs of restaurants were often employed to present this particular aspect in consciously evoking an imagery of sophisticated modernity This book presents the restaurant its cultural and typological history as it evolved over time In this unique combination it provides valuable knowledge for designers and students of design and for everyone

interested in the cultural history of the modern metropolis *Building Grand Central Terminal* Gregory Bilotto, Frank DiLorenzo, 2017-05-29 The history of Grand Central Terminal from construction to world famous landmark and its influence on the New York City community surrounding it Built in the heart of the Empire City is the world's greatest and most iconic railway terminal A colossal Beaux Arts style transport nexus Grand Central Terminal was completed in 1913 from the legacy of the railroad tycoon Cornelius Vanderbilt The terminal quickly became vital to travel and today accommodates 750 000 people daily This book documents the construction of Grand Central Terminal the former Grand Central Depot 1871 and Grand Central Station 1900 and illuminates the incredible story of the terminal that revolutionized transport developed Midtown Manhattan and opened railroad access to suburban areas *Material Imagination in Architecture* David Dernie, Jacopo Gaspari, 2016-07-07 *Material Imagination in Architecture* draws on history and the visual arts and contemporary architecture to explore this popular theme in architectural practice and education In the context of a discipline increasingly driven by digital production this text explores architecture and making and the diverse influences on the material reality of architectural form it argues that the crafts fabrication and assemblage of its making remain vital elements of contemporary architectural language This broad ranging text bridges the gap between a technical or otherwise fragmentary knowledge of materials of the specialist and the tacit or instinctive understanding of materials that the artist sculptor or architect may have It identifies key material themes pertinent to contemporary architectural debate and develops a discourse about future practice that is framed by environmental imperatives and grounded in a historical understanding of the meaning and use of materials Material iconology in architecture is a well established tradition and this book draws on that background to investigate the possibilities and limits of using materials in contemporary design to communicate the themes and contexts of an architectural project a material's relationship to context and to the history of practices that belong to the traditions of making buildings Each theme is explored in case studies from twelve countries around the world including the UK USA Spain Italy Germany Australia and China **The Rise and Fall of Pennsylvania Station** Gregory Bilotto, 2021 The construction of Pennsylvania Station 1904 1910 was a monumental undertaking for the voluminous earth displaced incredible innovation and brilliant French influenced classical architecture but it also was a quintessential archetype of the Gilded Age The station reshaped the economic and social fabric of New York by dislodging scores of families and local businesses It had been built for prestige and grandeur rather than sustainability and prolonged the rivalry with the New York Central and Hudson River Railroads leading to the creation of Grand Central Terminal Although the station was successful for increasing passenger journeys the rise of independent travel after World War II and mounting financial losses culminated with its unfortunate demise and eventual destruction Nevertheless through the misfortune of demolition emerged the first historic preservation laws which have saved countless historic buildings including its Park Avenue rival Back cover
