The Nature-Nurture Debates Dale Goldhaber,2012-07-09 How is it possible that in more than one hundred years the nature nurture debate has not come to a satisfactory resolution The problem Dale Goldhaber argues lies not with the proposed answers but with the question itself In The Nature Nurture Debate Goldhaber reviews the four major perspectives on the issue behavior genetics environment evolutionary psychology and developmental systems theory and shows that the classic reductionist strategies behavior genetics and environmental approaches are incapable of resolving the issue because they each offer a false perspective on the process of human development It is only through a synthesis of the two holistic perspectives of evolutionary psychology and developmental systems theory that we will be able to understand the nature of human behavior

Concepts and Theories of Human Development Richard M. Lerner,2018-04-19 Concepts and Theories of Human Development is the most comprehensive and in depth overview of the foundational theoretical contributions to understanding human development and the influence of these contributions for contemporary research and application in developmental science Since its initial publication in 1976 it has been an essential resource for students and professionals alike and has become the go to book for graduate students studying for their comprehensive exam on human development In this new Fourth Edition Richard M Lerner concentrates his focus on advanced students and scholars already familiar with the basic elements of major psychological theories The book discusses the assumptions involved in such topics as stage theories the nature nurture

issue the issue of continuity discontinuity and the important role of philosophical ideas about theories in particular metatheories in understanding the links between theory and research It particularly focuses on relational developmental systems RDS metatheory exploring its roots in the 1930s following its development into the present day and contrasting it with the fundamentally flawed genetic reductionist models that continue to be circulated by scientists the media and the general public It discusses implications of theory for research methods and for applications aimed at the promotion of health positive development and social justice among diverse people across the life span

Individuals as Producers of Their Own Development Richard M. Lerner, 2021-03-30 In the World Library of Psychologists series international experts present career long collections of what they judge to be their most interesting publications extracts from books key articles research findings and practical and theoretical contributions Professor Richard M Lerner has been prominent in the application of developmental science across the life span for half a century investigating dynamic relational development systems and their potential impact on positive youth development PYD and social justice In this collection Professor Lerner presents the development of his theory of and research about relations between life span human development and contextual or ecological change exploring the mutually influential relations between humans and their peer family school and community contexts Including a specially written introduction in which Professor Lerner reflects on the importance of mentorship and contextualises both the field and the evolution of his wide ranging career this collection will be a valuable resource for students and researchers of developmental psychology
