Sumudu A. Atapattu, Carmen G. Gonzalez, Sara L. Seck, 2021-04-01 Despite the global endorsement of the Sustainable Development Goals environmental justice struggles are growing all over the world These struggles are not isolated injustices but symptoms of interlocking forms of oppression that privilege the few while inflicting misery on the many and threatening ecological collapse This handbook offers critical perspectives on the multi dimensional intersectional nature of environmental injustice and the cross cutting forms of oppression that unite and divide these struggles including gender race poverty and indigeneity The work sheds new light on the often neglected social dimension of sustainability and its relationship to human rights and environmental justice Using a variety of legal frameworks and case studies from around the world this volume illustrates the importance of overcoming the fragmentation of these legal frameworks and social movements in order to develop holistic solutions that promote justice and protect the planet s ecosystems at a time of intensifying economic and ecological crisis      Between Care and Justice Elena Pulcini, 2024-05-01 Elena Pulcini 1950-2021 an internationally renowned philosopher of care was at the forefront of thinking and creating a new ethical framework to respond efficaciously to

problems that affect individuals at a global level This translation of Pulcini s last work addresses perhaps the two fundamental questions for our times namely Why care for others when we are not bound by personal relationships and Why commit to justice even when it does not personally affect us By focusing on passions such as indignation fear compassion resentment and love Pulcini offers an alternative ethical perspective in which justice and care intertwine to supplement and balance each other Together care and justice are proven capable of addressing the challenge of the other distant in space the outsider the marginalized and the migrant and time future generations In the end Pulcini proposes a form of moral education that nurtures and develops desirable moral sentiments for a more just world at the interpersonal social political economic and environmental levels thereby providing an alternative social global model to current individual focused rights based purely rationalist ethical systems      **Can Democracy Safeguard the Future?** Graham Smith, 2021-02-01 Our democracies

*Aging Studies and Ecocriticism* Nassim W. Balestrini, Julia Hoydis, Anna-Christina Kainradl, Ulla Kriebner, 2023-08-15 Aging Studies and Ecocriticism Interdisciplinary Encounters argues that both aging studies and ecocriticism address the complex dynamics of individual and collective agency oppression and dependency care and conviviality vulnerability and resistance as well as intergenerationality and responsibility Yet even though both fields employ overlapping methodologies and theoretical frameworks and scrutinize boundary texts in different literary genres which have been analyzed from ecocritical perspectives as well as from the vantage point of critical aging studies there has been little scholarly interaction between ecocritical literary studies and aging studies to date The contributors in this volume demonstrate the potential of specific genres to narrate relationality and age and the aesthetic and ethical challenges of imagining changes endings and survival in the Anthropocene As the first step towards putting both fields in conversation this collection offers new pathways into understanding human and nonhuman ecological relations

*Environmental Rights* Steve Vanderheiden, 2017-07-05 The essays selected for this volume present critical viewpoints from the debate about the need to establish rights on behalf of greater environmental protection Three main areas for developing environmental rights are surveyed including extensionist theories that link existing rights for example to subsistence or territory to threats of harm from exacerbated resource scarcity pollution or rapid environmental change proposals for rights to specified environmental goods or services such as

rights to a safe environment and the capacity to assimilate greenhouse gas emissions and rights that protect the interests of parties not currently recognized as having rights including nonhuman subjects natural objects and future generations This volume captures the potential for and primary challenges to the development of rights as instruments for safeguarding the planet's life support capacities and features proposals and analyses which argue the need to create an avenue of recourse against ecological degradation whether on behalf of human or nonhuman right holders
