Handbook of Motivation and Cognition Richard M. Sorrentino, Edward Tory Higgins, 1986 The apparent success of cognitive principles in accounting for several behaviors has led social psychologists to question the need for motivations and other hot dispositional constructs In their place they postulate nonmotivational cold cognitions Behavioral variations between individuals are thus reduced to differences in information processing abilities while biases and other apparently motivated behaviors are explained on the faulty computer model However as many cognitive psychologists now acknowledge this mechanistic theory fails to tie the processing of information to the performance of actions

Yzerbyt, Russell Spears, 2002-08-08 Stereotyping is one of the biggest single issues in social psychology but relatively little is known about how and why stereotypes form This is the first book to explore the process of stereotype formation the way that people develop impressions and views of social groups Conventional approaches to stereotyping assume that stereotypes are based on erroneous and distorted processes but the authors of this book take a very different view namely that stereotypes form in order to explain aspects of social groups and in particular to explain relationships between groups

Handbook of Motivation and Cognition: The interpersonal context Edward Tory Higgins, Richard M. Sorrentino, 1986 Volume 1 challenges the prevailing hot cold either or dichotomy and proposes instead the warm look a synergistic approach to the roles of hot motivations and cold cognitions in the production of behavior Highly acclaimed as a groundbreaking work Contemporary Psychology called it an extremely valuable contribution to the field Unique as a handbook rather than summarizing an existing body of knowledge it attempts to define and shape an emerging field Volume 2 continues to emphasize both theory and research on the motivation cognition interface However the range of approaches has been widened to include clinical developmental political and cognitive

psychological as well as the social and personality perspectives prominent in the first volume Volume 3 like its acclaimed predecessors presents timely original work on the interface of motivation and cognition Rather than looking at the self affect and goals as primarily intrapersonal variables however Volume 3 shifts its concern to the role of motivation and cognition in interpersonal and intergroup behavior Reflecting an increasing awareness of the impact of intergroup strife in contemporary life leading researchers and theorists of social relations discuss topics including how we use others to further evaluate the self how the self affects our judgment of others the role of stereotyping and prejudices and how we evaluate and interact with ingroups and outgroups from book description Amazon com

Foundations of Affective Social Learning Daniel Dukes, Fabrice Clément, 2019-08-29 Written by experts in comparative developmental social cognitive and cultural psychology this book introduces the novel concept of affective social learning to help explain why what matters to us matters to us In the same way that social learning describes how we observe other people's behaviour to learn how to use a particular object affective social learning describes how we observe other people's emotions to learn how to value a particular object person or event As such affective social learning conceptualises the transmission of value from a given culture to a given person and reveals why the things that are so important to us can be of no consequence at all to others

From Prejudice to Intergroup Emotions Diane M. Mackie, Eliot R. Smith, 2016-01-28 The theories or programs of research described in the chapters of this book move beyond the traditional evaluation model of prejudice drawing on a broad range of theoretical ancestry to develop models of why when and how differentiated reactions to groups arise and what their consequences might be The chapters have in common a re-focusing of interest on emotion as a theoretical base for understanding differentiated reactions to and differentiated behaviors toward social groups The contributions also share a focus on specific interactional and structural relations among groups as a source of these differentiated emotional reactions The chapters in the volume thus reflect a theoretical shift from an earlier emphasis on knowledge about ingroups and outgroups to a new perspective on prejudice in which socially grounded emotional differentiation becomes a basis for social regulation
