Colombia and Chile *Handbook of Children's Rights* Martin D. Ruck, Michele Peterson-Badali, Michael Freeman, 2016-12-08

While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self-determination With contributions from a wide range of international scholars the *Handbook of Children's Rights* brings together research theory and practice from diverse perspectives on children's rights This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child evolving capacities of the child states rights versus children's rights rights of children versus parental or family rights children as citizens children's rights versus children's responsibilities and balancing protection and participation In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g. childhood studies developmental psychology sociology of childhood anthropology and political science The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis This comprehensive cosmopolitan and timely volume serves as an important reference for both scholarly and policy-driven interest in the voices and perspectives of children and youth *Dialogues in Middle Level Education Research Volume 3* David C. Virtue, 2024-02-20

This insightful book presents and discusses the dialogues that took place in the New Directions in Middle Level Education Research session at the 2022 Association for Middle Level Education (AMLE) conference Carefully crafted and expert-led chapters draw upon four recent studies that were published in *Research in Middle Level Education Online* the research journal of AMLE and which were featured in a roundtable discussion at the 2022 AMLE conference Each section of the book includes one of the four studies accompanied by two companion pieces offering different perspectives on the work In the companion essays the original authors enrich and extend their research by incorporating feedback from the conference session discussions revisiting their findings and conclusions considering alternative approaches to further research and proposing new or clarified implications for practice The book also comprises contributions from middle level education experts who offer

responses to each study offering perspectives critiques and commentaries Reflecting the generative dialogic knowledge building process that took place at the AMLE conference it showcases the collaborative work of middle level researchers who draw ideas and inspiration for their studies from prior research and accounts of practice as well as their own experiences in the field This book is an excellent resource for researchers doctoral students and academics in the fields of middle level education educational research and research methods in education Civic Engagement of Asian American Student Leaders Ma. Glenda Lopez Wui,Cameron S. White,2022-11-23 Civic Engagement of Asian American Student Leaders examines the civic lives of Asian American youth and analyzes their civic engagement through in depth interviews with fifteen student leaders from a Tier One university in Southeast Texas This book provides a counter narrative to the portrayal of Asian Americans as apolitical and less interested in civic matters Such depictions arise from the characterization of Asian Americans as model minority who mainly focus on economic success and are socially and economically integrated in American society However the stories of the student leaders cultivated by Ma Glenda Lopez Wui and Cameron S White illustrate that their challenging racialized experiences inspired their civic involvement Their civic engagement creates empowerment in terms of asserting their ethnic identity imbibing leadership qualities and long term commitment to civic engagement and subverting stereotypes against Asian Americans The book paints a more varied picture of Asian American youth civic engagement that is not entirely anchored in ethnic identity or non political involvement contrary to articulations of existing studies Wui and White hope that the student leaders narratives shed better light on the civic commitments of Asian Americans to American society especially in these times when there is increased bias and racial prejudice in the current atmosphere and culture *Working with Young People* Xavier Úcar,Pere Soler-Masó,Anna Planas-Lladó,2020 It is common to refer to the dynamism and vitality of young people as a source of change creation and innovation but they are often also considered a problem that we do not know how to respond to Young people can make adults feel uncomfortable because they are neither children who can be told what to do nor adults to be treated as equals From the perspective of adults their status is socially and culturally ambiguous Civic Education in the Twenty-First Century Donald M. Gooch,Michael T. Rogers,2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a

revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters
