Manual of Cardiovascular Disease in Women Angela H.E.M. Maas, Eva Gerds, 2024-09-27 This manual defines sex and gender differences in cardiovascular disease and how they have become an important topic within most subspecialties in the field of cardiology It is now evident that sex differences in biology and lifestyle influence the pathophysiology of heart disease Consequently risk factors for cardiac disease are modified by sex and gender and women and men develop partly different variants of the same heart diseases These facts profoundly influence prevention and

management in clinical practice Good medical practice demands a more tailored and personal care for each individual patient In addition the life course of women has a few unique phases related to hormonal changes in pregnancy and after menopause that also interact with individual risk and the development of co morbidities As heart disease is now the number one cause of death in women worldwide a more specific attention to cardiovascular disease in women is justified Most important advances in gender specific knowledge are related to ischemic heart disease and its traditional and sex specific risk factors Diagnostic pathways have changed coronary angiography is no longer the gold standard that it used to be Recent guidelines and position papers have paid attention to these new insights whereas educational programs urgently need to be adapted The ongoing paradigm shift in cardiology needs to be updated for the clinician in an easy and accessible manner Other important topics in which sex and gender differences have been elaborated are heart failure atrial fibrillation aortic valve disease and its treatment cardiac rehabilitation co morbidities cardiotoxicity in cancer treatment and neurology In addition female specific risk factors and socio economic factors are relevant to women s cardiovascular health We will invite the best EU experts in this field to contribute to the various chapters Manual of Cardiovascular Disease in Women has an educational role for established cardiologists and vascular specialists in training nurses and other allied professionals It represents an update on the most recent insights in sex and gender differences in cardiovascular health with a focus on women s cardiovascular diseases Additional questions via app Download the Springer Nature Flashcards app for free and use exclusive additional material to test your knowledge

Handbook of Positive

Psychology in Schools Michael J. Furlong, Richard Gilman, E. Scott Huebner, 2009-03-04 National surveys consistently reveal that an inordinate number of students report high levels of boredom, anger, and stress in school, which often leads to their disengagement from critical learning and social development. If the ultimate goal of schools is to educate young people to become responsible and critically thinking citizens who can succeed in life, understanding factors that stimulate them to become active agents in their own learning is critical. A new field labeled positive psychology is one lens that can be used to investigate factors that facilitate a student's sense of agency and active school engagement. The purposes of this groundbreaking Handbook are to 1) describe ways that positive emotions, traits, and institutions promote school achievement and healthy social/emotional development; 2) describe how specific positive psychological constructs relate to students and schools and support the delivery of school-based services; and 3) describe the application of positive psychology to educational policy making. By doing so, the book provides a long-needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner. Key features include: Comprehensive: this book is the first to provide a comprehensive review of what is known about positive psychological constructs and the school experiences of children and youth. Topical: coverage ranges from conceptual foundations to assessment and intervention issues to service delivery models. Intrapersonal factors (e.g., hope, life satisfaction) and interpersonal factors (e.g., positive peer and family relationships) are examined, as is classroom and school-level influences (e.g., student-teacher and school-community relations). Interdisciplinary Focus: this volume brings together the divergent perspectives, methods, and findings of a broad interdisciplinary community of scholars whose work often fails to reach those working in contiguous fields. Chapter Structure: to insure continuity, flow, and readability, chapters are organized as follows: overview, research summary, relationship to student development, examples of real-world applications, and a summarizing table showing implications for future research and practice. Methodologies: chapters feature longitudinal studies, person-centered approaches, experimental and quasi-experimental designs, and mixed methods.
