Building of Bangladesh and the Indian Institute of Management in Ahmedabad can at first seem as enigmatic and beguiling as the man who designed them. In attempts to describe these structures we are often forced to speak in contradictions and paradoxes: structures that seem at once unmistakably modern and ancient; enormous built spaces that offer a sense of intimate containment; designs in which light itself seems tangible, as raw material as tactile as travertine or Kahn's beloved concrete. This is where Lesser's talents as one of our most original and gifted cultural critics come into play. Interspersed throughout her account of Kahn's life and career are exhilarating in situ descriptions of what it feels like to move through his built structures. Drawing on extensive original research, lengthy interviews with his children, his colleagues and his students, and travel to the far flung sites of his career defining buildings, Lesser has written a landmark biography of this elusive genius, revealing the mind behind some of the twentieth century's most celebrated architecture. *The Art Museums of Louis I. Kahn* Patricia Cummings Loud, Louis I. Kahn, 1989. The art museum has become a prestige commission for contemporary architects and for several decades reference has been made to a museum building boom. Among these new museums, those of Louis Kahn are especially admired. This significant American architect who ranks in this century with Frank Lloyd Wright both as a creator and as an influence has made a special contribution to the architecture of museums and has helped create a subtle but telling change in the concept of what a late twentieth century museum building should be. After a brief look at the development of a tradition in museum architecture, this study examines Kahn's three art museums: the Yale University Art Gallery, the Kimbell Art Museum, and the Yale Center for British Art. It traces the development of each museum through its various stages, the background of the institutions and the commissions, the programs for the buildings, their designs and evolutions, their constructions, and the evaluations of the completed buildings. Material on Kahn's plans for a museum for the De Menil collection, begun shortly before his death, is also included. Accompanying the text are illustrations of the buildings, including Kahn's personal sketches, architectural plans and sections, and presentation perspective drawings. Photographs of the finished buildings present the transformed vision of the architect in tangible form, showing that the museums, while related, are individualized accomplishments. This is the first comprehensive study of Kahn's museums. *Understanding Context* Andrew Hinton, 2014-12-02.
