The Death of Metaphysics; The Death of Culture Mark J. Cherry, 2006-08-05 The Latin root of the English word culture ties together both worship and the tilling of the soil In each case the focus is the same a rightly directed culture produces either a bountiful harvest or falls short of the mark materially or spiritually This volume critically explores the nature and depth of our contemporary cultural crisis its lack of traditional orientation and moral understanding Prime among the issues at stake are the meaning and significance of birth copulation suffering and

death expressed in debates regarding human embryo experimentation and stem cell research the character of moral and scientific norms as well as more fundamentally the character of an adequate epistemology for coming to appreciate the deep nature of reality and its normative implications Given varying background ontological epistemological and axiological presuppositions different moral positions and political objections will appear as not merely morally permissible but as socially and politically obligatory

Fundamentals of the Stem Cell Debate Kristen Renwick Monroe, Ronald Miller, Jerome Tobis, 2008 What the editors have managed to accomplish with *Fundamentals of the Stem Cell Debate* is very significant The book is well informed sophisticated and attends to the moral and scientific complexities of stem cell research rather than sweeping them under the rug This book encompasses the complexities without sacrificing the other main virtue of the collection to definitively

illuminate the debate for all Jason Scott Robert author of Embryology Epigenesis Evolution Taking Development Seriously

Selfish Genes and Christian Ethics Neil Messer, 2007-03-30 The evolutionary origins of human beings and in particular the origins of human morality have always attracted debate and speculation not just in the academic community but in popular science and the wider general population as well The arguments and explanations put forward over the years seem to thoroughly catch the popular imagination but there is the danger that these explanations tend to step outside the bounds of scientific theory and become powerful popular myths instead In Neil Messer's *Selfish Genes and Christian Ethics* the author is challenging this tendency Instead he provides a Christian theological anthropology which among other things aims to give Christians and the churches the confidence to engage with assumptions that evolutionary theory and religious beliefs are untenable This is a valuable resource for anyone engaged in the study of theology providing the reader with the ability to consider both the theoretical and the practical questions raised by evolutionary discussions of ethics and morality

The Political Morality of Liberal Democracy Michael J. Perry, 2010 This important new work elaborates and defends an account of the political morality of liberal democracy Stem Cell Now Christopher Thomas Scott, 2006-08-29 While many believe stem cell research holds the key to curing a wide range of ailments others see this research as opening a Pandora's box that will devalue human life In *Stem Cell Now* Christopher Scott executive director of Stanford University's Stem Cells and Society Program lays out the scientific and ethical issues surrounding this national dilemma Scott guides readers through the latest advances in stem cell research in clear accessible language telling the stories of the researchers who are exploring the potential of stem cells to cure cancer grow new organs and repair the immune system He also leads readers through a discussion of the question at the heart of the explosive ethical debate How as a society do we balance our responsibilities to the unborn and the sick *Stem Cell Now* is essential reading for anyone who wants to build an informed opinion on stem cell research

Encyclopedia of Stem Cell Research ,2008 Provides an understanding of the basic concepts in stem cell biology and addresses the politics ethics and challenges currently facing the field From publisher description

Encyclopedia of Stem Cell Research Clive N. Svendsen,Allison D. Ebert,2008-08-12 What is a stem cell We have a basic working definition but the way we observe a stem cell function in a dish may not represent how it functions in a living organism Only this is clear Stem cells are the engine room of multicellular organisms both plants and animals However controversies breakthroughs and frustration continue to swirl in eternal storms through this rapidly moving area of research But what does the average person make of all this and how can an interested scholar probe this vast sea of information The Encyclopedia of Stem Cell Research provides a clear understanding of the basic concepts in stem cell biology and addresses the politics ethics and challenges currently facing the field While stem cells are exciting alone they are also clearly fueling the traditional areas of developmental biology and the field of regenerative medicine These two volumes present more than 320 articles that explore major topics related to the emerging science of stem cell research and therapy Key Features Describes the different types of stem cells that have been reported so far and where possible tries to explain for each age tissue and species what is known about the biology of the cells and their history Captures a strong sense of stem cell biology as it stands today and provides the reader with a reference manual to probe the mysteries of the field Considers various religious legal and political perspectives Includes selected reprints of major journal articles that pertain to the milestones achieved in stem cell research Elucidates stem cell terminology for the nonscientist Key Themes Biology Clinical Trials Countries Diseases Ethics History and Technology Industry Institutions Legal Organizations People Politics Religion States With contributions from scholars and institutional experts in the stem cell and social sciences this Encyclopedia provides a primarily nonscientific resource to understanding the complexities of stem cell research for academic and public libraries

Jewish Faith and Modern Science Norbert M. Samuelson,2008-10-17 In *Jewish Faith and Modern Science* renowned Jewish philosopher and rabbi Norbert Samuelson argues that modern Jewish philosophy has died_ that it has failed to address

the challenges to traditional beliefs posed by scientific advances and is therefore no longer relevant to Jews today Samuelson confronts these challenges head on critically reflecting on how all of the forms of contemporary Judaism from orthodox to liberal to secular to new age can address questions raised by the latest scientific advances Considering questions ranging from the existence of the soul to the relationship between God and particle physics to the debate over when life begins and ends Samuelson paves the way for a rebirth of Jewish philosophy applicable to life in the modern world *Theological Bioethics* Lisa Sowle Cahill,2005-11-16 The field of bioethics was deeply influenced by religious thinkers as it emerged in the 1960s and early 1970s Since that time however a seemingly neutral political liberalism has pervaded the public sphere resulting in a deep suspicion of those bringing religious values to bear on questions of bioethics and public policy As a theological ethicist and progressive Catholic Lisa Sowle Cahill does not want to cede the religious perspective to fundamentalists and the pro life movement nor does she want to submit to the gospel of a political liberalism that champions individual autonomy as holy writ In *Theological Bioethics* Cahill calls for progressive religious thinkers and believers to join in the effort to reclaim the best of their traditions through jointly engaging political forces at both community and national levels In Cahill s eyes just access to health care must be the number one priority for this type of participatory bioethics She describes a new understanding of theological bioethics that must go beyond decrying injustice beyond opposing social practices that commercialize human beings beyond painting a vision of a more egalitarian future Such a participatory bioethics she argues must also take account of and take part in a global social network of mobilization for change it must seek out those in solidarity those involved in a common calling to create a more just social political and economic system During the past two decades Cahill has made profound contributions to theological ethics and bioethics This is a magisterial and programmatic statement that will alter how the religiously inclined understand their role in the great bioethics debates of today and tomorrow that yearn for clear thinking and prophetic wisdom **Technē** Gerald Hiestand,Todd A. Wilson,2022-11-18 Christians have an increasingly complex and often conflicted relationship with technology As Genesis 1 succinctly and profoundly declares God created humanity in his image and as part of that vocation we are called to make something of the world Technology is one of the most important and powerful ways that human beings exercise this dominion But while technology can extend our humanity in powerful and exciting ways many of us feel that it can compromise or fracture our humanity at its core As a result questions quickly emerge What does it mean to be human How does our creation in the image of God affect the way we use design and understand technology Should our general posture toward technology be cautious or optimistic This collection of scholarly and pastoral essays drawn from the 2019 annual theology conference of the Center for Pastor Theologians offers substantive Christian reflection on a wide range of issues pertinent to a distinctly Christian vision of technology today and in the future **Controversies in Contemporary Religion** Paul Hedges,2014-09-09 Religious or spiritual beliefs underpin many controversies and conflicts in the contemporary world

Written by a range of scholarly contributors this three volume set provides contextual background information and detailed explanations of religious controversies across the globe Controversies in Contemporary Religion Education Law Politics Society and Spirituality is a three volume set that addresses a wide variety of current religious issues analyzing religion s role in the rise of fundamentalism censorship human rights environmentalism and sustainability sexuality bioethics and other questions of widespread interest Providing in depth context and analysis far beyond what s available in the news or online this work will enable readers to understand the nature of and reasons for controversies in current headlines The first volume covers theoretical and academic debates the second looks at debates in the public square and ethical issues while the third examines specific issues and case studies These volumes bring detailed and careful debate of a range of controversies together in one place including topics not often covered for example how religions promote or hinder social cohesion and peace the relationship of religions to human rights and the intersection of Buddhism and violence Written by a range of experts that includes both established and emerging scholars the text explains key debates in ways that are accessible and easy to understand for lay readers as well as undergraduate students researching particular issues or global religious trends

Christian in Public L. D. Hansen, 2008-02-01 Higher education has not escaped the imperative of transformation which has marked the post apartheid South African landscape The nature of the changes at universities however is open to critique Fundamental questions concerning the ideological moorings of knowledge and the politics of the curriculum have not yet been satisfactorily addressed During the apartheid era theology faculties played influential roles at traditional universities and were often characterised by unsettling exclusion of non Christian religions non Calvinist denominations and marginalised voices This volume of essays evidences a process at the University of the Free State s Faculty of Theology to reflect seriously about the need for transformation at the fundamental level that is of knowledge The challenge for theology at a public university is framed in terms of epistemological transformation A number of outstanding public intellectuals such as Jonathan Jansen Crain Soudien and Lis Lange have been invited to present papers to clarify the conceptual challenge and what this might entail for theology Well known theologians such as Conrad Wethmar Allan Boesak and Martin Prozesky reflect on the nature of theology and religion at universities amidst social exigencies Two international theologians Harold Attridge from the prestigious Yale Divinity School and Bram van de Beek from the Free University of Amsterdam share their experiences of institutions that exemplify excellence and ecumenical openness Theologians from the Departments of Practical Theology and Systematic Theology at the University of the Free State writing from the inside articulate the challenges they envision for theology in a post apartheid dispensation The essays represent a variety of perspectives but all attest to a commitment to re think the nature and task of theology at a public university accepting the challenge of knowledge and power of plurality and otherness and of restorative intellectual justice These timely essays make a unique contribution to the discourses on transformation and on theology at a public university
