Sustainable Development in Chemical Engineering Vincenzo Piemonte, Marcello De Falco, Angelo Basile, 2013-05-28 Sustainable development is an area that has world wide appeal from developed industrialized countries to the developing world. Development of innovative technologies to achieve sustainability is being addressed by many European countries, the USA, and also China and India. The need for chemical processes to be safe, compact, flexible, energy efficient, and environmentally benign and conducive to the rapid commercialization of new products poses new challenges for chemical engineers. This book examines the newest technologies for sustainable development in chemical engineering through careful analysis of the technical aspects and discussion of the possible fields of industrial development. The book is broad in its coverage and is divided into four sections: Energy Production covering renewable energies, innovative solar technologies, cogeneration plants, and smart grids; Process Intensification describing why it is important in the chemical and petrochemical industry; the engineering approach and nanoparticles as a smart technology for bioremediation; Bio based Platform Chemicals including the production of bioethanol and biodiesel, bioplastics production and biodegradability, and biosurfactants; Soil and Water Remediation covering water management and re use and soil remediation technologies. Throughout the book there are case studies and examples of industrial processes in practice.

Treatment of Navy Landfill Leachate Contaminated with Low Levels of Priority Pollutants Chloe Jue, Raymond W. Regan, 1991 *Management of Contaminated Site Problems, Second Edition* Kofi Asante-Duah, 2019-04-12 This book outlines the strategies used in the investigation, characterization, management, and restoration and remediation for various contaminated sites. It draws on real world examples from across the globe to illustrate remediation techniques and discusses their applicability. It provides guidance for the successful corrective action assessment and response programs for any type of contaminated land problem and at any location. The systematic protocols presented will aid environmental professionals in managing contaminated land and associated problems more efficiently. This new edition adds twelve new chapters and is fully updated and expanded throughout.
