Head Case Treat Yourself To Better Mental Health:

Head Case Pamela Stephenson, 2007 Have you ever felt blue Do you turn to food for comfort Are you unable to sleep despite overwhelming exhaustion You are not alone 154 million people globally suffer depression which is just the tip of the mental illness iceberg The vast majority receive no treatment due to an immense lack of specialists resources and understanding But this doesn't mean you have to suffer in silence HEAD CASE gives you the clinical expertise without the professional jargon Dr Pamela Connolly offers simple self assessment tools and down to earth information on a wide range of mental health problems She explains everything that can go wrong with your mind and sets out easy steps to start feeling better straight away HEAD CASE is the most comprehensive book of its kind covering everything from mood personality and sleep disorders to anxiety trauma and addiction It addresses the effect of childhood experiences on later life and how to deal with issues from the past It is a helpful practical and positive guide that will inspire readers to make manageable steps towards a more joyful life

Head Case Pamela Stephenson Connolly, 2009 154 million people globally suffer depression which is just the tip of the mental illness iceberg The vast majority receive no treatment due to an immense lack of specialists resources and understanding Dr Pamela Stephenson Connolly offers simple self assessment tools and down to earth information on a wide range of mental health problems clinical expertise minus the professional jargon She explains everything that can go wrong with your mind and sets out easy steps to start feeling better straight away This guide covers everything from mood personality and sleep disorders to anxiety trauma and addiction and it addresses the effect of childhood experiences on later life and how to deal with issues from the past This helpful practical and positive guide will inspire readers to make manageable steps towards a more joyful life

The Dangerous Rise of Therapeutic Education Kathryn Ecclestone, Dennis Hayes, 2009-05-07 The silent ascendancy of a therapeutic ethos across the education system and into the workplace demands a book that serves as a wake up call to everyone Kathryn Ecclestone and Dennis Hayes controversial and compelling book uses a wealth of examples across the education system from primary schools to university and the workplace to show how therapeutic education is turning children young people and adults into anxious and self preoccupied individuals rather than aspiring optimistic and resilient learners who want to know everything about the world The chapters address a variety of thought provoking themes including how therapeutic ideas from popular culture dominate social thought and social policies and offer a diminished view of human potential how schools undermine parental confidence and authority by fostering dependence and compulsory participation in therapeutic activities based on disclosing emotions to others how higher education has adopted therapeutic forms of teacher training because many academics have lost faith in the pursuit of knowledge how such developments are propelled by a deluge of political initiatives in areas such as emotional literacy emotional well being and the soft outcomes of learning *The Dangerous Rise of Therapeutic Education* is eye opening reading for every teacher student teacher and parent who retains any belief in the power of knowledge to transform people's

lives Its insistent call for a serious public debate about the emotional state of education should also be at the forefront of the minds of every agent of change in society from parent to policy maker

Educating Children with Complex Conditions

Winand H Dittrich, Rona Tutt, 2008-09-18 This is an important contribution to the field of SEN By putting the child into a context the authors recognize that each child is unique and cannot be reduced to a simple diagnosis Highly recommended SEN Magazine In just over 100 pages this book gives the clearest account I have yet read of overlapping and co existing conditions All professionals working with children with complex conditions will find it both interesting and practical Special The book is written in an easily digestible form and provides insight into overlapping conditions as well as advice on support to those working to meeting the needs of pupils with these complex disorders SNIP Many have tried but few have succeeded in bringing together the varying threads of special educational needs into a concise and proactive format I know having tried and failed myself Here at last Dittrich and Tutt have created a fascinating account of the current SEN world and have succeeded in my opinion in demystifying and explaining the significance of specific SEN terms while illustrating that overlap is more the norm than the exception Well researched and written with both clarity and experience the authors stress that there really is no such thing as a SEN child but that some children are in essence more interesting in their learning and behaviour style than others Fintan O Regan Author and Consultant There are growing numbers of children displaying the symptoms of more than one condition or disorder and this has led to those involved in education needing to understand which conditions commonly overlap or co exist and how to meet children s more complex needs By bringing together some of the latest research on how the brain learns with what is known about identifying developmental disorders that appear to have a common biological basis this book covers what is known about a common group of disorders including ADHD autistic spectrum disorders dyslexia dyscalculia and dyspraxia how to recognise when a child may have more than one condition what teaching approaches and strategies might be most relevant Written in a non technical style the book blends together scientific knowledge from different disciplines and translates it into practical terms for school leaders practitioners in the field of special educational needs and disabilities and students following courses in higher education

Hurricane to a

Rainbow Jamie Kershaw, Sarah May Tulip, 2025-01-06 Minds matter They re as important to our wellbeing as our feet are to walking Hurricane to a Rainbow takes these conditions and looks at them in detail A Breakthrough Mental Health Research Project that explores both the curious relationship and the sixteen common bonds we propose link them all Anxiety PTSD and BPD are both Interviews and Researched In 2007 I met one of my closest friends who happens to be High Functioning on the Autistic Spectrum With a long term diagnosis of Schizophrenia Psychotic Disorder there are many with similar challenges So putting all this together there was an obvious motive to write this book Taking an evidence base from detailed literature review covering wider issues within Mental Health Ten first hand interviews conducted with Professionals and those with Lived Experience cover the facts research some advice and support to others as well as the conditions relationship to culture

With a signpost to a number of books and movies we feel inspire and inform enjoy Live learn and embrace the experience
