Riordan, 2008-08-26 Ajax is no longer an experimental approach to website development but the key to building browser

based applications that form the cornerstone of Web 2.0. Head First Ajax gives you an up to date perspective that lets you see exactly what you can do and has been done with Ajax. With it you get a highly practical in depth and mature view of what is now a mature development approach. Using the unique and highly effective visual format that has turned Head First titles into runaway bestsellers, this book offers a big picture overview to introduce Ajax and then explores the use of individual Ajax components including the JavaScript event model, DOM, XML, JSON, and more as it progresses. You'll find plenty of sample applications that illustrate the concepts along with exercises, quizzes, and other interactive features to help you retain what you've learned. Head First Ajax covers:

- The JavaScript event model
- Making Ajax requests with XMLHttpRequest objects
- The asynchronous application model
- The Document Object Model (DOM)
- Manipulating the DOM in JavaScript
- Controlling the browser with the Browser Object Model
- XHTML Forms
- POST Requests
- XML Syntax and the XML DOM tree
- XML Requests
- Responses
- JSON, an alternative to XML
- Ajax architecture patterns
- The Prototype Library

The book also discusses the server side implications of building Ajax applications and uses a black box approach to server side components. Head First Ajax is the ideal guide for experienced web developers comfortable with scripting, particularly those who have completed the exercises in Head First JavaScript, and for experienced programmers in Java, PHP, and C who want to learn client side programming.

Head First JavaScript Michael Morrison, 2007-12-20

So you're ready to make the leap from writing HTML and CSS web pages to creating dynamic web applications. You want to take your web skills to the next level. And you're finally ready to add programmer to the resume. It sounds like you're ready to learn the Web's hottest programming language: JavaScript. Head First JavaScript is your ticket to going beyond copying and pasting the code from someone else's web site and writing your own interactive web pages. With Head First JavaScript you learn:

- The basics of programming from variables to types to looping
- How the web browser runs your code and how you can talk to the browser with your code
- Why you'll never have to worry about casting, overloading, or polymorphism when you're writing JavaScript code
- How to use the Document Object Model to change your web pages without making your users click buttons

If you've ever read a Head First book, you know what to expect: a visually rich format designed for the way your brain works. Head First JavaScript is no exception. It starts where HTML and CSS leave off and takes you through your first program into more complex programming concepts like working directly with the web browser's object model and writing code that works on all modern browsers. Don't be intimidated if you've never written a line of code before. In typical Head First style, Head First JavaScript doesn't skip steps, and we're not interested in having you cut and paste code. You'll learn JavaScript, understand it, and have a blast along the way. So get ready: dynamic and exciting web pages are just pages away.
