establish the role played by other fundamental aspects of the learning process including learner and teacher perspectives learning strategies task design and general pedagogical approaches The first part of this book provides a variety of theoretical approaches to the question of what integration means in CLIL addressing key skills and competences that are taught and learned in CLIL classrooms and exploring the role of content and language teachers in achieving an integrated syllabus The second part takes specific cases and experimental studies conducted at different educational levels and analyses them in the light of theoretical considerations
