Internal Revenue Service, 1993 Religious Methods and Resources in Bioethics P.F. Camenisch, 2013-03-09 A volume on religious theological methods in biomedical ethics inevitably of whether the methodological dimension can be distin raises the question quished from the various other things that go on in ethical discourse It is difficult to answer this question definitively since many

elements in moral conversation can be interpreted in different ways Barbara Hilkert Andolsen illustrates this issue in this volume when she defines one of her crucial categories gender justice as being both procedural and substantive normative This difficulty of finally separating the methodological from the normative arises in many areas of contemporary ethical writing both feminist and otherwise Nevertheless it seems that in many cases we can separate out the methodological issues with considerable precision Albert Jonsen and James Childress achieve just such a sharp focus in their essays This does not mean that a careful dissecting of their papers would not reveal normative elements lurking about their methodological points It is simply to say that the issues they analyze and the positions they take are at least *prima facie* overwhelmingly methodological They are much more about how we think about ethical matters than they are about what we think about them

Tristram Engelhardt Jr., Mark J. Cherry, 2002-05-20 Roman Catholic moral theology is the point of departure for this multifaceted exploration of the challenge of allocating scarce medical resources The volume begins its exploration of

discerning moral limits to modern high technology medicine with a consensus statement born of the conversations among its contributors The seventeen essays use the example of critical care because it offers one of the few areas in medicine where there are good clinical predictive measures regarding the likelihood of survival As a result the health care industry can with increasing accuracy predict the probability of saving lives and at what cost Because critical care involves hard choices in the face of finitude it invites profound questions about the meaning of life the nature of a good death and distributive justice For those who identify the prize of human life as immortality the question arises as to how much effort should be invested in marginally postponing death In a secular culture that presumes that individuals live only once and briefly there is an often unacknowledged moral imperative to employ any means necessary to postpone death The conflict between the free choice of individuals and various aspirations to equality compounds the challenge of controlling medical costs while also offering high tech care to those who want its possible benefits It forces society to confront anew notions of ordinary versus extraordinary and proportionate versus disproportionate treatment in a highly technologically structured social context This cluster of discussions is enriched by five essays from Jewish Orthodox Christian and Protestant perspectives Written by premier scholars from the United States and abroad these essays will be valuable reading for students and scholars of bioethics and Christian moral theology
