Health As Liberation Medicine Theology And The Quest For Justice:

Health as Liberation Alastair V. Campbell, 2005-07-22 Deftly quilting themes of Latin American and feminist liberation theologies with those of philosophers such as Immanuel Kant and John Rawls Alastair V Campbell displays our rich interconnectedness and our moral responsibilities to one another Suggesting that many American citizens are oppressed by our current health care system he contends that prior to questions of health care allocation are questions of what we mean as a society by the term health and how that term is inextricably linked to personal and social freedom and liberation In the forceful final chapter of the book Campbell articulates ethical standards for just health care delivery in the United States standards that above all take account of deep religious faith and concern for one's neighbor *Health as Liberation* is a critical analysis of justice and modern health care and of a society's moral obligations to its citizens

Mental Health Systems

Compared R. Paul Olson, 2006 The primary objective of this book is to provide comprehensive descriptions and make comparative evaluations of each of the mental health systems of four Western industrialized countries The countries selected illustrate a continuum from a highly centralized and publicly financed national health service in Great Britain to a predominantly decentralized and more privately financed market of mental health services in the United States In between these two contrasting types are examples of national health services and insurance programs in Norway and Canada Contributing experts from each country begin their chapters with an overview of the geographic demographic political economic and cultural contexts in which their mental health systems are situated Thereafter they a present national data to estimate the need for mental health services b describe national mental health policies and programs designed to meet their population's need c indicate how mental health services are organized and delivered and d discuss how their system is financed and provided resources A common chapter outline facilitates comparisons among all four systems on relevant evaluation criteria a access and equity b quality and efficacy c cost and efficiency d financing and fairness e protection and participation and f population relevance In the final section of each chapter the authors provide recommendations for improved performance of their mental health system In the initial chapter the editor provides an overview introduces the four countries selected and defines the evaluation criteria applied by all contributing authors The final two chapters address convergence and divergence among the four systems and provide recommendations for improvement and for future comparative studies The intended audience includes mental health policymakers program administrators and managers teachers of graduate level courses relat

Bearing Witness Courtney S. Campbell, 2019-09-09 In *Bearing Witness* Courtney S Campbell draws on his experience as a teacher scholar and a bioethics consultant to propose an innovative interpretation of the significance of religious values and traditions for bioethics and health care The book offers a distinctive exposition of a covenantal ethic of gift response responsibility transformation that informs a quest for meaning in the profound choices that patients families and professionals face in creating sustaining and ending life Campbell's account of bearing witness offers

new understandings of formative ethical concepts situates medicine as a calling and vocation rooted in concepts of healing affirms professional commitments of presence for suffering and dying persons and presents a prophetic critique of medical assisted death This book offers compelling critiques of secular models of medical professionalism and of individualistic assumptions that distort the physician patient relationship This innovative interpretation bears witness to the relevance of religious perspectives on an array of bioethical issues from new reproductive technologies to genetics to debates over end of life ethics and bears witness against the oddities of a market oriented and consumerist vision of health care that is especially salient for an era of health care reform

Healthcare Ministry Gerald A. Arbuckle,2000 Healthcare Ministry

Annals of Bioethics: Regional Perspectives in Bioethics Mark J. Cherry,John F. Peppin,2005-08-10 Regional Perspectives in Bioethics illustrates the ways in which the national and international political landscape encompasses persons from diverse and often fragmented moral communities with widely varying moral intuitions premises evaluations and commitments

Spirits of Protestantism Pamela E. Klassen,2011-06-25 Klassen s book is much more than a first rate study of how two churches in Canada positioned themselves within the ostensibly parallel worlds of biomedicine and spiritual healing It is at its core an insightful meditation on the relationship between liberal Protestantism and the project of modernity A must read not only for students of Christianity but all those interested in the legacies of secularism and enchantment

Globalization and Health Belinda Bennett,George F. Tomossy,2006-06-21 Within contemporary society globalization has emerged as a key concern at the centre of ethical legal and policy debates relating to health care Conflicts between public interests and individual rights the challenge of regulating

health professionals and access to health services and the effects of a global market all feature prominently in these discussions. As a result of globalization these issues can no longer be understood solely within the political boundaries that define traditional notions of individuals and communities. Rather, solutions demand a global conception of rights and obligations which in turn requires new approaches to health policy formulation and a reevaluation of existing ethical and legal frameworks. In essence, the impact of globalization on human health is testing the robustness of modern regulatory systems, legal doctrines, and ethical paradigms.

PUBLIC HEALTH DEVELOPING GLOBAL CONCERNS

The interconnectedness of the global economy presents new challenges in public health. While globalization has facilitated improvements in health care, it has also created new hazards and avenues for the exploitation of vulnerable persons. It is becoming increasingly apparent that both national and international responses are required. Indeed, as the chapters in this section convey, public health is rightly a global concern. Globalization has led to a sharing of both risks and responsibilities in public health. Belinda Bennett reminds us of the ease with which infectious diseases can spread within the global community given the speed of modern travel and trade.

Coercion as Cure Frank Villafana, 2017-07-12

Understanding the history of psychiatry requires an accurate view of its function and purpose. In this provocative new study, Szasz challenges conventional beliefs about psychiatry. He asserts that in fact, psychiatrists are not concerned with the diagnosis and treatment of bona fide illnesses. Psychiatric tradition, social expectation, and the law make it clear that coercion is the profession's determining characteristic. Psychiatrists may diagnose or treat people without their consent or even against their clearly expressed wishes, and these involuntary psychiatric interventions are as different as are sexual relations between consenting adults and the sexual violence we call rape. But the point is not merely the difference between coerced and consensual psychiatry but to contrast them. The term psychiatry ought to be applied to one or the other but not both. As long as psychiatrists and society refuse to recognize this, there can be no real psychiatric historiography. The coercive character of psychiatry was more apparent in the past than it is now. Then, insanity was synonymous with unfitness for liberty. Toward the end of the nineteenth century, a new type of psychiatric relationship developed when people experiencing so-called nervous symptoms sought help. This led to a distinction between two kinds of mental diseases: neuroses and psychoses. Persons who complained about their own behavior were classified as neurotic, whereas persons about whose behavior others complained were classified as psychotic. The legal, medical, psychiatric, and social denial of this simple distinction and its far-reaching implications undergirds the house of cards that is modern psychiatry.

Coercion as Cure is the most important book by Szasz since his landmark *The Myth of Mental Illness*.

Bioethics: The Basics Alastair Campbell, 2017-07-14

Bioethics: The Basics is an introduction to the foundational principles, theories, and issues in the study of medical and biological ethics. Readers are introduced to bioethics from the ground up before being invited to consider some of the most controversial but important questions facing us today. Topics addressed include the range of moral theories underpinning bioethics arguments for the rights and wrongs of abortion.
