policies practices institutions and interpersonal behavior leading to a more just society Even if our collective consent to equal opportunity is devoid of much substance it forms a shaky platform for a more thoughtful exploration and deliberation of what equal opportunity requires of us individually and collectively This book offers a substantive concept principle and disposition that can guide our thinking about justice and rescue us from an empty cliché It proposes meaningful content for equal opportunity as a morally socially politically and science informed conception The how of equal opportunity requires that society its structures its associations and its individual citizens foster the capability of persons to become qualified to pursue a variety of outcomes they may choose The absence of prejudice irrelevant to qualifications in making appointments to positions at some starting line is required but insufficient Equality of opportunity calls for many renewals by society throughout the lives of its participants which includes new possibilities for persons disabled or incarcerated and for all persons as they age
