She overhauled the couple's neglected boat and with a male friend nearly half her age sailed away. Except it wasn't that easy. Susan had always relied on Craig to make the sailing decisions and Alex, her young first mate, was a sailing novice. Call Me Captain follows Susan as she leaves everything behind or tries to and sails to spectacular but isolated Palmyra Atoll to work as a volunteer biologist. Susan helps rescue baby sea turtles, bands seabirds, and corrals ten-pound coconut crabs that look like Godzillas with knife-blade claws. She determinedly repairs her sailboat, skippers it through terrifying storms, and to her surprise finds she and Craig are falling in love all over again. This time the two rediscover one another via satellite phone: Susan calling from her tiny floating speck in the middle of the Pacific Ocean to Craig in his hospital emergency room on Oahu. Susan writes with passion about swimming with manta rays, kayaking with sharks, and sailing with whales and dolphins. In those passages she shows ways these magnificent animals guided her through the journey of a lifetime. Her memoir of self-discovery is a romance, a rousing sea tale, and a personal account of nature's power to put life in perspective. *Life Stories* Maureen O'Connor, 2011-08-23

Describing titles that range from travel and adventure classics and celebrity autobiographies to foodie memoirs and environmental reads, *Life Stories: A Guide to Reading Interests in Memoirs, Autobiographies, and Diaries* presents a unique overview of the genre that specifically addresses the needs of readers' advisors and others who work with readers in finding books. *The Medical circular* [afterw.] *The London medical press & circular* [afterw.] *The Medical press & circular*, 1879 **The Cure for Women** Lydia Reeder, 2024-12-03

How Victorian male doctors used false science to argue that women were unfit for anything but motherhood, and the brilliant doctor who defied them. After Elizabeth Blackwell became the first woman to graduate from medical school, more women demanded a chance to study medicine. Barred entrance to universities like Harvard, women built their own first-rate medical schools and hospitals. Their success spurred a chilling backlash from elite white male physicians who were obsessed with eugenics and the propagation of the white race. Distorting Darwin's evolution theory, these haughty physicians proclaimed in bestselling books that women should never be allowed to attend college or enter a profession because their menstrual cycles made them perpetually sick. Motherhood was their constitution and duty. Into the midst of this turmoil marched tiny dynamic Mary Putnam Jacobi, daughter of New York publisher George Palmer Putnam, and the first woman to be accepted into the world-renowned Sorbonne medical school in Paris. As one of the best-educated doctors in the

world she returned to New York for the fight of her life Aided by other prominent women physicians and suffragists Jacobi conducted the first ever data backed scientific research on women s reproductive biology The results of her studies shook the foundations of medical science and higher education Full of larger than life characters and cinematically written *The Cure for Women* documents the birth of a sexist science still haunting us today as the fight for control of women s bodies and lives continues Mormon History Ronald Warren Walker,David J. Whittaker,James B. Allen,2001 *Autobiography of Thomas Guthrie ... and memoir by his sons D.K. and C.J. Guthrie* Thomas Guthrie,1875 **Men and Women of the Time** Victor Plarr,1899 Social Intelligence Daniel Goleman,2006-09-26 Emotional Intelligence was an international phenomenon appearing on the New York Times bestseller list for over a year and selling more than five million copies worldwide Now once again Daniel Goleman has written a groundbreaking synthesis of the latest findings in biology and brain science revealing that we are wired to connect and the surprisingly deep impact of our relationships on every aspect of our lives Far more than we are consciously aware our daily encounters with parents spouses bosses and even strangers shape our brains and affect cells throughout our bodies down to the level of our genes for good or ill In *Social Intelligence* Daniel Goleman explores an emerging new science with startling implications for our interpersonal world Its most fundamental discovery we are designed for sociability constantly engaged in a neural ballet that connects us brain to brain with those around us Our reactions to others and theirs to us have a far reaching biological impact sending out cascades of hormones that regulate everything from our hearts to our immune systems making good relationships act like vitamins and bad relationships like poisons We can catch other people s emotions the way we catch a cold and the consequences of isolation or relentless social stress can be life shortening Goleman explains the surprising accuracy of first impressions the basis of charisma and emotional power the complexity of sexual attraction and how we detect lies He describes the dark side of social intelligence from narcissism to Machiavellianism and psychopathy He also reveals our astonishing capacity for mindsight as well as the tragedy of those like autistic children whose mindsight is impaired Is there a way to raise our children to be happy What is the basis of a nourishing marriage How can business leaders and teachers inspire the best in those they lead and teach How can groups divided by prejudice and hatred come to live together in peace The answers to these questions may not be as elusive as we once thought And Goleman delivers his most heartening news with powerful conviction we humans have a built in bias toward empathy cooperation and altruism provided we develop the social intelligence to nurture these capacities in ourselves and others *The Lancet* ,1875 Boston Medical and Surgical Journal ,1869 **The Medical Times and Gazette** ,1854 *The Boston Medical and Surgical Journal* ,1868
