Miletich,1990-01-16 Public safety professionals work together in life and death situations During natural or transportation disasters industrial accidents shootings suicides or dozens of other instances police officers firefighters and paramedics are called upon to assist both injured and uninjured people Although often romanticized in television series and in films the real life tasks of public safety professionals are usually unpleasant restraining violent individuals and removing accident homicide and suicide victims from death scenes and always highly stressful They are frequently subjected to additional stress when their efforts are criticized by family members of the injured or deceased Although stress can be harmful even fatal police officers firefighters and paramedics can have more productive and satisfying lives when they learn to positively control stress rather than be controlled by it This English language bibliography consisting of more than 700 references covering the time period 1945 to early 1989 can help these and other professionals manage stress more effectively Source publications all of which are annotated include books articles conference proceedings theses government publications and dissertations The bibliography section is composed of six chapters addressing psychological and physiological factors the family substance abuse accidents and suicide with references arranged alphabetically by author surname A list of acronyms and author and subject indexes complete the work Of paramount importance to police officers firefighters and paramedics as well as their families this bibliography will provide legislators physicians nurses social workers psychiatrists psychologists and sociologists with extensive and substantial documentation on the stress filled work lives of these public safety professionals

Police Division,1972 Confidential Informants Jon Shane,2015-09-19 While confidential informants CI s can play a crucial role in police investigations they also have the potential to cause great harm if they are dishonest The process by which police agencies qualify a CI to work and the strength of agency policy may be the source of the problem This Brief examines the integrity problem involving CIs in police operations within the United States provides an overview of pitfalls and problems related to veracity and informant integrity including the difficulties in detecting when a CI is lying and compares the provisions of actual published police policy to the model CI policy published by the International Association of

Chiefs of Police IACP The analysis shows a wide divergence between actual police policy and the national standard promulgated by the IACP The Brief provides policy recommendations for improving use of CIs that can potentially reduce or eliminate integrity problems that can lead to organizational accidents such as wrongful arrests and convictions injuries or deaths Some Courts have issued measures to ensure that information received from CIs is reliable by examining sworn testimony and documents related to their work However as this Brief explores this judicial effort arises only after a police operation has taken place and the use of force even deadly force has already been employed The author proposes integrity testing beforehand which would allow police to have a greater understanding of a CI s motivation ability and veracity when conducting law enforcement operations In addition there are aspects of police policy that can enhance CI management such as training supervision and entrapment that can further guard against integrity problems Although integrity testing is not flawless it does interpose an additional step in the CI management process that can help guard against wrongful conviction and perjury that harms the judicial process
