Kinesiology is the study of human and nonhuman animal body movements, performance, and function by applying the sciences of biomechanics, anatomy, physiology, psychology, and neuroscience. Applications of kinesiology in human health include physical education, teacher, the rehabilitation professions such as physical and occupational therapy, as well as applications in the sport and exercise industries. Kinesiology is a field of scientific study and does not prepare individuals for clinical practice. Complex types of activities are found more in the field of sport. To import the activities to the players or sport persons, it requires energy, swiftness, ability, and situations. In the field of sport, knowledge of kinesiology is used to make their skills of techniques more dynamic. In the industries, employees and labours are required to undergo a vigorous work. The present book, entitled *Kinesiology and Physical Education*, discusses all the aspects of kinesiology. **ACT in Practice** Patricia A. Bach, Daniel J. Moran, 2008.
