Now we've got a language tuned for building web applications with Web storage, 2D drawing, offline support, sockets and threads and more. And to speak this language you've got to go beyond HTML5 markup and into the world of the DOM events and JavaScript APIs. Now you probably already know all about HTML markup otherwise known as structure and you know all about CSS style presentation but what you've been missing is JavaScript behavior. When you add behavior with JavaScript you can create an interactive experience even better you can create full blown web applications. **Head First HTML5 Programming** is your ultimate tour guide to creating web applications with HTML5 and JavaScript and we give you everything you need to know to build them including how to add interactivity to your pages, how to communicate with the world of Web services and how to use the great new APIs being developed for HTML5. Here are just some of the things you'll learn in **Head First HTML5 Programming**. Learn how to make your pages truly interactive by using the power of the DOM. Finally understand how JavaScript works and take yourself from novice to well informed in just a few chapters. HTML5's new 2D drawing surface. Go beyond just plugging a video into your pages and create custom video experiences. Learn the secret to grabbing five megabytes of storage in every user's browser. Improve your page's responsiveness and performance with Web workers. And much more. **Head First Design Patterns** Eric
