

Jarvis: Physical Examination and Health Assessment, 8th Edition

Chapter 23: Musculoskeletal System

Answer Keys: Study Guide and Lab Manual

1. 1. In *non-synovial* joints, the bones are united by fibrous tissue or cartilage and are immovable (e.g., the sutures in the skull) or only slightly movable (e.g., the vertebrae). *Synovial* joints are freely movable, because they have bones that are separated from each other and are enclosed in a joint cavity.
2. 2. The four signs of acute inflammation:
 1. (1) Exquisite tenderness.
 2. (2) Swelling.
 3. (3) Heat.
 4. (4) Redness.
- 3. The differences are as follows:
 - • Dislocation: one or more bones in a joint are out of position.
 - • Subluxation: partial dislocation of a joint.
 - • Contracture: shortening of a muscle leading to limited range of motion of a joint.
 - • Ankylosis: stiffness or fixation of a joint.
- 4. Test active range of motion by asking the person to move his or her joint voluntarily. To test passive range of motion, anchor the joint with one hand while your other hand slowly moves it to its limit. The normal ranges of active and passive motion should be the same.
- 5. To measure true leg length: measure between fixed points, from the anterior iliac spine to the medial malleolus, crossing the medial side of the knee (see Fig. 23.45). Normally these measurements are within 1 cm of each other. To measure apparent leg length, when true leg length is equal but the legs still look unequal, measure from a nonfixed point (the umbilicus) to a fixed point (medial malleolus) on each leg.
- 6. See the text description of Ortolani maneuver and refer to Fig. 23.46.
- 7. See test description of functional assessment for the older adult, under "Normal Range of Findings."
- 8. See photograph and descriptions of swan-neck deformity and boutonnière deformity in Table 23.4, Abnormalities of the Wrist and Hand.
- 9. Bouchard nodes are bony overgrowths on the proximal interphalangeal joints. Heberden nodes are bony overgrowths of the distal interphalangeal joints. Both types of nodes are hard and nontender, and occur with osteoarthritis. See photograph in Table 23.4, Abnormalities of the Wrist and Hand.

Labeling Exercises:

- • See Fig. 23.8.
- • See Fig. 23.1.
- • See Fig. 23.13.

Health Assessment Musculoskeletal Study Guide Jarvis

Guillaume Favre

ACCESSIBLE GUIDE TO THE MUSCULOSKELETAL SYSTEM Each of the twelve volumes in Peate's Body Systems series is rooted in the belief that a deep and thorough understanding of the human body is essential for providing the highest standard of care. Offering clear, accessible and up-to-date information on different body systems, this series bridges the gap between complex scientific concepts and practical everyday applications in health and care settings. This series makes for an invaluable resource for those committed to understanding the intricacies of human biology, physiology and the various systems that sustain life. The Musculoskeletal System is the perfect companion for students and newly registered practitioners across nursing and allied health fields with an interest in musculoskeletal care, providing a comprehensive yet easy-to-digest guide for both academic and clinical application. Equips healthcare students and practitioners with the necessary information to provide safe and competent care. Features colourful illustrations to aid comprehension, clarify complicated concepts and render content more engaging and accessible. Empowers readers to adapt to a rapidly evolving healthcare landscape, preparing them for the future of healthcare delivery. Contains information necessary for effective patient care of those with osteoarthritis, osteoporosis, bone cancer and other musculoskeletal diseases and conditions.

Student Laboratory Manual for Physical Examination and Health Assessment Carolyn Jarvis, 2003. High technology cannot replace the bedside assessment of the patient; by the physician, argues Jarvis, a family nurse practitioner with Chestnut Health Systems. She presents the new edition of her textbook explaining health history taking, methods, physical examination skills, health promotion techniques and clinical assessment tools. The edition adds chapters on domestic violence assessment, pain assessment and the development of critical thinking skills. The CD-ROM contains case studies, video demonstrations and printable patient health promotion guides. Annotation c 2003 Book News, Inc., Portland, OR, booknews.com

A Practical Approach to Musculoskeletal Medicine - E-Book Elaine Atkins, Emily Goodlad, Sharon Chan-Braddock, 2022-10-18. Fully updated to reflect modern research and the latest evidence. A Practical Approach to Musculoskeletal Medicine is the only textbook based on the approach developed by Dr James Cyriax that has been recently updated to reflect modern research and the latest evidence. It covers the assessment, clinical diagnosis and conservative management of common soft tissue lesions. The book covers the theory underpinning the principles and practice of musculoskeletal medicine, then goes on to discuss anatomy, assessment, common conditions and their management for each region and provides resources to support the recording of assessment and to enhance safety. This book is ideal for postgraduates undertaking courses at the Society of Musculoskeletal Medicine and is highly relevant for undergraduates, allied health professionals, advanced nurse practitioners and medical practitioners. In fact, all orthopaedic and musculoskeletal clinicians working in different settings as part of a multi-professional team. Covers theory of musculoskeletal medicine based on the model developed by Dr James Cyriax, supported by the latest evidence. Covers pain theory, principles of assessment and management, histology and biomechanics of the soft tissues and the healing process. Provides resources to support the recording of assessments and to enhance safety, especially

whilst learning the musculoskeletal medicine approach Presents review questions and case scenarios at the end of each chapter to revise key principles of the approach Offers online resources comprising video clips self assessment questions and an image bank Numerous illustrations and photographs support learning Suitable for Society of Musculoskeletal Medicine SOMM postgraduate courses Section on shared decision making and management packages of common musculoskeletal conditions Pain mechanisms including psychosocial assessment and the influence of psychosocial factors on pain and associated disabilities in musculoskeletal practice Updates on tendinopathy soft tissue injury management injection therapy and differential diagnosis More on pharmacology medications and indications for imaging and further investigations More emphasis on screening biopsychosocial models health comorbidities poly pharmacies lifestyle risk factors medical complexities and masqueraders of other body systems Muscle tables detailing movements prime movers and assistors
