Reclaiming Human Rights in a Changing World Order Christopher Sabatini,2022-10-07 Human rights and the international institutions that strive to protect them are under increasing attack from powerful actors on the global stage from recent political trends even within established democracies and from new technologies Together these threats have undermined what had been a fragile international consensus as recently as two decades ago about the importance of concerted international action to protect human rights and punish those who abuse them China Russia and other nondemocratic regimes have become increasingly bold in acting as if agreed upon international human rights standards no longer exist or at least do not apply to them More broadly domestic political movements based on nationalism religion and populism are challenging human rights norms on nearly every continent And new technologies including autonomous weapons systems and relentless digital surveillance have given national leaders new ways to control or even abuse their citizens with impunity This book examines these new challenges to international and regional human rights in Africa Europe Latin America and the Middle East It is the result of a year of workshops with human rights activists and young leaders from around the world with chapters written by a diverse group of leading scholars Beyond describing the challenges to human rights the book offers targeted practical recommendations for national and multilateral policymakers activists and scholars for concrete actions to protect human rights as well as improve public understanding of why doing so is essential *Reclaiming Human Rights in a Changing World Order* will interest scholars of international relations and human rights law domestic and international activists involved in human rights indeed anyone wanting to understand the implications for the liberal international order of the new geopolitical competition modern technology and political and social movements

setbacks considerable progress has been made in improving the rights and wellbeing of children For instance polio has almost been eradicated globally and school enrolment levels are beginning to recover following the COVID 19 pandemic These are positive signs of our ability to work together to tackle entrenched social problems that affect children This progress indicates that practical solutions can be implemented to create better opportunities and conditions This book seeks to bring cohesion to the fragmented field of child protection with a new global approach and framework The approach is rights based public health focused and seeks to enhance the capacities of all children by keeping them safe and protected The aim is a childhood free from violence and one in which children s voice and agency according to their age and maturity are recognized Whether the reader is actively engaged in these issues or personally curious valuable perspectives on the current landscape of child protection are offered The highlighting of the profound impact of climate change poverty conflict and exclusion on the lives and protection of children makes it a timely contribution to the literature Written by an international group of experts and practitioners the chapters address the most pressing concerns in this complex area including labour trafficking migration adoption foster care and alternative care war natural disasters and various forms of violence The chapters are categorized under three distinct headings advancing a fresh perspective on child safety and protection addressing the challenge and charting the path forward Throughout the work the authors emphasize the underlying principles of children s rights systemic approaches to prevention tackling adverse social norms and addressing the challenge of insufficient resource allocation

Vietnam's Children in a Changing World Rachel Burr,2006-03-24 Like the majority of children living in the global South today a large number of Vietnamese youths work to help support their families International human rights organizations have focused on these children seeking to bring their lives into line with an understanding of childhood

that is generally accepted in the developed world In this ethnographic study Rachel Burr draws on her daily observations of working children in Hanoi and argues that these youngsters are misunderstood by the majority of agencies that seek to help them Most aid programs embrace a model of childhood that is based on Western notions of individualism and bountiful resources They further assume that this model is universally applicable even in cultures that advocate a collective sense of self and in countries that do not share the same economic advantages Burr presents the voices and experiences of Vietnamese children in the streets in a reform school and in an orphanage to show that workable solutions have become lost within the rhetoric propagated by aid organizations The reality of providing primary education or adequate healthcare for all children for instance does not stand a chance of being achieved until adequate resources are put in place Yet organizations preoccupied with the child rights agenda are failing to acknowledge the distorted global distribution of wealth in favor of Western nations Offering a unique firsthand look at the experiences of children in contemporary Vietnam this book also provides a broad analysis of how internationally led human rights agendas are often received at the local level
