Reinventing Rural Gregory M. Fulkerson, Alexander R. Thomas, 2016-10-19 Reinventing Rural is a collection of original research papers that examine the ways in which rural people and places are changing in the context of an urbanizing world. This includes exploring the role of the environment, the economy and related issues such as tourism. While traditionally relying on primary sector work in agriculture, mining, natural resources and the like, rural areas are finding new ways to sustain themselves. This involves a new emphasis on environmental protection as one important strategy has been to capitalize on natural amenities to attract residents and tourists. Beyond improvements to the economy are general improvements to the quality of life in rural communities. Consistent with this, the volume focuses on the two cornerstones of education and health, considering current challenges and offering ideas for reinventing rural quality of life. *Arabic Psychological Tests and Their English Versions* Ahmed M. Abdel-Khalek, 2020-11-09 Measurement is an important concern for the progress of psychology both as a basic science and as a field of application. This book presents a collection of personality and psychopathology scales developed originally in Arabic and translated into English since self-reports and questionnaires play a prominent role in psychological research and practice as they are simple and cost less than other methods of assessment. Furthermore, these scales are suitable in surveys and epidemiological studies with large samples. El presente manual reúne de forma introductoria los conceptos claves de Psicología Social partiendo desde las teorías clásicas hasta investigaciones y aplicaciones prácticas más recientes. El libro consta de nueve capítulos que persiguen además exponer los modelos teóricos más relevantes. Tal como se señala en el capítulo 1 la Psicología Social tiene relaciones con otras disciplinas afines que estudian tanto al ser humano como las sociedades en las cuales se desenvuelve. Sin embargo presenta diferencias con otros enfoques ya que el objeto de estudio de la Psicología y también de la Psicología Social es la conducta y su predicción. De esta manera el enfoque de los modelos que aparecen en este manual se centra en los procesos psicológicos subyacentes su interacción con el contexto social y la conducta que desarrollan los individuos. A lo largo del primer capítulo se muestra una definición formal de Psicología Social explicando qué es qué no es y cuáles son su objeto de estudio qué es lo que diferencia a la Psicología Social del sentido común y de otras disciplinas afines y la aplicación del método científico para abordar la investigación que desarrollan los psicólogos y psicólogas sociales. El segundo capítulo aborda el estudio de las actitudes tema central dentro de la Psicología Social. Las actitudes son necesarias y adaptativas para los seres humanos cumpliendo diferentes funciones. Conociendo las actitudes que manifiesta una persona hacia un determinado objeto actitudinal se puede predecir su comportamiento y realizar intervenciones orientadas a un cambio actitudinal que promueva el cambio de la conducta por ejemplo mediante programas de prevención. El capítulo termina explicando la influyente teoría de la disonancia cognitiva que muestra que también se puede producir el efecto contrario es decir cómo nuestra conducta puede modificar nuestras actitudes. El capítulo 3 se encuentra directamente relacionado con el anterior ya que trata los

procesos de persuasión cambio actitudinal y comportamental Seg n se expone en este cap tulo la persuasi n depende de tres elementos fundamentales la fuente del mensaje persona o personas que emiten el mensaje el mensaje en s y el objetivo del mensaje receptor o audiencia del intento persuasivo Asimismo en este cap tulo se explican los seis principios b sicos de influencia que Robert Cialdini sistematiza a la hora de promover el cambio actitudinal y conductual amistad simpat a compromiso coherencia escasez reciprocidad validaci n social y autoridad La conducta de ayuda es el objeto del cap tulo 4 En primer lugar se define qu se entiende por conductas prosociales en Psicolog a Social y la diferencia con otros t rminos relacionados conducta de ayuda altruismo coraje moral y cooperaci n se alando qu factores situacionales y personales promueven que los seres humanos ayuden o no a otros En este sentido es de central importancia la explicaci n del efecto espectador y la consiguiente formulaci n del modelo de intervenci n en emergencias Por ltimo se expone la perspectiva de la persona receptora de la ayuda ya que la recepci n de ayuda puede tener consecuencias psicol gicas positivas o negativas para la persona que la recibe El quinto cap tulo se centra en el estudio de la conducta agresiva Es necesario entender que la conducta agresiva como la conducta de ayuda es parte del repertorio conductual de los seres humanos El cap tulo se centra en la contribuci n de la Psicolog a Social a la comprensi n de la conducta agresiva diferenci ndola de otros conceptos relacionados y presentando una visi n general de los factores personales y situacionales que predisponen la conducta agresiva Los estereotipos son uno de los t picos clave en el campo de estudio de la Psicolog a Social A diferencia de otras disciplinas afines la Psicolog a Social se ha centrado en el estudio de los estereotipos desde la perspectiva del procesamiento de la informaci n y lo que es m s importante su influencia sobre la conducta manifiesta El sexto cap tulo explica el proceso de aprendizaje y asimilaci n de estereotipos para posteriormente se alar qu ventajas evolutivas y motivacionales generan el uso de estereotipos Tambi n trata el modelo del contenido del estereotipo d nde ya se muestra c mo a trav s de dos dimensiones estereot picas se puede predecir el comportamiento hacia miembros de otros grupos Finalmente el cap tulo se centra en dos de las categor as que se encuentra cr nicamente activadas en nuestros sistemas cognitivos el sexo y la edad El cap tulo 7 relativo al prejuicio y la discriminaci n se encuentra articulado en torno a tres ejes El primero de ellos alude a los modelos cl sicos del prejuicio desarrollados desde la Psicolog a Social partiendo de los enfoques basados en diferencias individuales hasta aquellos que conceptualizan el prejuicio como un fen meno intergrupar En un segundo lugar se centra en grupos que son objeto de prejuicio etnia personas con discapacidad sexismo y edadismo El tercer bloque se encuentra constituido por aquellas estrategias que se han propuesto para la reducci n del prejuicio hacia otros grupos sociales El octavo cap tulo del manual se centra en los procesos grupales y las relaciones intergrupales El tema comienza definiendo qu es un grupo dentro de la perspectiva de la Psicolog a Social para posteriormente definir dos procesos claves de influencia del grupo sobre sus miembros la influencia normativa e informativa En segundo lugar se centra en tres procesos grupales formaci n cohesi n y toma de decisiones en grupo Finalmente se trata el conflicto intergrupar El ltimo cap tulo del manual muestra de forma

introdutoria los modelos de Psicología Social Aplicada donde el foco de interés se centra en poner en práctica la investigación psicosocial para promover el cambio social y la mejora de la calidad de vida de las personas. El tema muestra diferentes ámbitos de aplicación de la Psicología Social en el ámbito educativo en la reducción del prejuicio en el contexto legal en el ámbito de la salud y en las aplicaciones medioambientales. A lo largo de estos nueve capítulos el manual no solo presenta los fundamentos teóricos de la disciplina sino que también pretende estimular el pensamiento crítico y la reflexión ofreciendo una visión holística y contemporánea del estudio de la compleja interacción entre los procesos psicológicos individuales y el contexto social. No podemos terminar esta presentación sin mencionar que dentro de la Psicología Social destacan otras áreas de estudio como la cognición social los procesos de atribución el autoconcepto o el rol de la cultura que no se abordan en profundidad en este manual por la extensión que requeriría. No obstante tras esta lectura introductoria a la Psicología Social esperamos haber sembrado el interés y los fundamentos para buscar más información al respecto. Esperamos que las personas que lean este manual disfruten tanto con los diferentes capítulos como los autores y autoras han disfrutado escribiéndolos. Además de una cuidadosa redacción académica se ha intentado acercar los contenidos más teóricos a la vida real incluyendo ejemplos de actualidad y referencias para ampliar información. Asimismo se han propuesto actividades al final de cada capítulo y preguntas de autoevaluación para repasar el aprendizaje. El manual cierra con un glosario en el que se recogen algunos términos que resultan de especial relevancia a lo largo de todo el texto. Os damos la bienvenida a esta introducción a la Psicología Social. El coordinador Antonio Bustillos López.
