Transforming Ethnomusicology Volume I Beverley Diamond, Salwa El-Shawan Castelo-Branco, 2021 For decades ethnomusicologists across the world have considered how to affect positive change for the communities they work with Through illuminating case studies and reflections by a diverse array of scholars and practitioners Transforming Ethnomusicology aims to both expand dialogues about social engagement within ethnomusicology and at the same time transform how we understand ethnomusicology as a discipline The first volume of Transforming Ethnomusicology focuses on ethical practice and collaboration examining the power relations inherent in ethnography and offering new strategies for transforming institutions and ethnographic methods These reflections on the broader framework of ethnomusicological practice are complemented by case studies that document activist approaches to the study of music in challenging contexts of poverty discrimination and other unjust systems

Audiobooks, Literature, and Sound Studies Matthew Rubery, 2011-05-09 This is the first scholarly work to examine the cultural significance of the talking book since the invention of the phonograph in 1877 the earliest machine to enable the reproduction of the human voice Recent advances in sound technology make this an opportune moment to reflect on the evolution of our reading practices since this remarkable

invention Some questions addressed by the collection include How does auditory literature adapt printed texts What skills in close listening are necessary for its reception What are the social consequences of new listening technologies In sum the essays gathered together by this collection explore the extent to which the audiobook enables us not just to hear literature but to hear it in new ways Bringing together a set of reflections on the enrichments and impoverishments of the reading experience brought about by developments in sound technology this collection spans the earliest adaptations of printed texts into sound by Charles Dickens Thomas Hardy and other novelists from the late nineteenth century to recordings by contemporary figures such as Toni Morrison and Barack Obama at the turn of the twenty first century As the voices gathered here suggest it is time to give a hearing to one of the most talked about new media of the past century **Discordant**

Democracy: Noise, Affect, Populism, and the Presidential Campaign Justin Patch, 2019-01-15 **Discordant Democracy** Noise Affect Populism and the Presidential Campaign paints a portrait of the political experience at a pivotal time in American political and social history The modern political campaign is aestheticized and assimilated into mass culture divorced from fact and policy and nakedly tethered to emotional appeal Through a multi modal comparative examination of the sonic and emotional cultures of the 2008 and 2016 campaigns Justin Patch raises critical queries about our affective relationship to modern politics and the impact of emotional campaigning on democracy **Discordant Democracy** asks how do campaign sounds affect us what role do we the electorate play in creating and sustaining these sounds and affects and what actions do they generate Theories from anthropology cognitive science sound studies and philosophy are engaged to grapple with these questions and connect bombastic mass mediated political events campaign media and individual sonic experience The analyses complicate notions of top down campaigning political spin and enthusiastic millennial populism by examining our role in producing and animating political sounds through conversation applause laughter media and music **The**

Sound Worlds from the Body to the City Ariane Wilson, 2019-03-13 This volume reveals the extent to which aural perception influences our spatial awareness Spanning various fields and practices from psychology to geography and from zoology to urban planning it covers a range of environments in which sounds contribute to forming our sense of

space and place The contributions gathered here lead from the mother's womb through the habitats of insects and owls to the resonating bodies of buildings and the city to artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention **Sounds of Modern**

History Daniel Morat, 2014-09-01 Long ignored by scholars in the humanities sound has just begun to take its place as an important object of study in the last few years Since the late 19th century there has been a paradigmatic shift in auditory cultures and practices in European societies This change was brought about by modern phenomena such as urbanization industrialization and mechanization the rise of modern sciences and of course the emergence of new sound recording and transmission media This book contributes to our understanding of modern European history through the lens of sound by examining diverse subjects such as performed and recorded music auditory technologies like the telephone and stethoscope and the ambient noise of the city *Sounding Otherness in Early Modern Drama and Travel* Jennifer Linhart

Wood, 2019-04-23 Winner of the Medieval and Renaissance Drama Society's 2021 Bevington Award for Best New Book Sounds are a vital dimension of transcultural encounters in the early modern period Using the concept of the soundwave as a vibratory uncanny and transformative force Jennifer Linhart Wood examines how sounds of foreign otherness are experienced and interpreted in cross cultural interactions around the globe Many of these same sounds are staged in the sonic laboratory of the English theater rattles were shaken at Whitehall Palace and in Brazil bells jingled in an English masque and in the New World the Dallam organ resounded at Topkap Palace in Istanbul and at King's College Cambridge and the drum thundered across India and throughout London theaters This book offers a new way to conceptualize intercultural contact by arguing that sounds of otherness enmesh bodies and objects in assemblages formed by sonic events calibrating foreign otherness with the familiar self on the same frequency of vibration **The Grand Theater of the World**

Valeria De Lucca, Christine Jeanneret, 2019-09-03 Music and space in the early modern world shaped each other in profound ways and this is particularly apparent when considering Rome a city that defined itself as the grande teatro del mondo The aim of this book is to consider music and space as fundamental elements in the performance of identity in early modern Rome Rome's unique milieu as defined by spiritual and political power as well as diplomacy and competition between aristocratic families offers an exceptionally wide array of musical spaces and practices to be explored from an interdisciplinary perspective Space is viewed as the theatrical backdrop against which to study a variety of musical practices

in their functions as signifiers of social and political meanings The editors wish to go beyond the traditional distinction between music theatrical spectacles namely opera and other musical genres and practices to offer a more comprehensive perspective on the ways in which not only dramatic but also instrumental music and even the sounds of voices and objects in the streets relied on the theatrical dimension of space for their effectiveness in conveying social and political messages While most chapters deal with musical performances some focus on specific aspects of the Roman soundscape or are even intentionally silent dealing with visual arts and architecture in their performative and theatrical aspects The latter offer a perspective that creates a visual counterpoint to the ways in which music and sound shaped space *Sound and Noise*

Marcia Jenneth Epstein,2020-10-30 This book is about how you listen and what you hear about how to have a dialogue with the sounds around you Marcia Jenneth Epstein gives readers the impetus and the tools to understand the sounds and noise that define their daily lives in this groundbreaking interdisciplinary study of how auditory stimuli impact both individuals and communities Epstein employs scientific and sociological perspectives to examine noise in multiple contexts as a threat to health and peace of mind as a motivator for social cohesion as a potent form of communication and expression of power She draws on a massive base of specialist literature from fields as diverse as nursing and neuroscience sociology and sound studies acoustic ecology and urban planning engineering anthropology and musicology among others synthesizing and explaining these findings to evaluate the ubiquitous effects of sound in everyday life Epstein investigates speech and music as well as noise and explores their physical and cultural dimensions Ultimately she argues for an engaged public dialogue on sound built on a shared foundation of critical listening and provides the understanding for all of us to speak and be heard in such a discussion *Sound and Noise* is a timely evaluation of the noise that surrounds us how we hear it and what we can do about it

Acoustemologies in Contact Emily Wilbourne, Suzanne G. Cusick, 2021-01-19 In this fascinating collection of essays an international group of scholars explores the sonic consequences of transcultural contact in the early modern period They examine how cultural configurations of sound impacted communication comprehension and the categorisation of people Addressing questions of identity difference sound and subjectivity in global early modernity these authors share the conviction that the body itself is the most intimate of contact zones and that the culturally contingent systems by which sounds made sense could be foreign to early modern listeners and to present day scholars Drawing on a global range of archival evidence from New France and New Spain to the slave ships of the Middle Passage to China Europe and the Mediterranean court environment this collection challenges the privileged position of European acoustical practices within the discipline of global historical musicology The discussion of Black and non European experiences demonstrates how the production of the canon in the cosmopolitan centres of colonial empires was underpinned by processes of human exploitation and extraction of resources As such this text is a timely response to calls within the discipline to decolonise music history and to contextualise the canonical works of the European past This volume is accessible to a wide and interdisciplinary audience not only within musicology but also to those interested in early modern global history sound studies race and slavery

Masculinity and Western Musical Practice Kirsten Gibson, 2017-07-05 How have men used art music How have they listened to and brandished the musical forms of the Western classical tradition and how has music intervened in their identity formations This collection of essays addresses these questions by examining some of the ways in which men music and masculinity have been implicated with each other since the Middle Ages Feminist musicologies have already dealt extensively with music and gender from the phallogentric tendencies of the Western tradition to the explicit marginalization of women from that tradition This book builds on that work by turning feminist critical approaches towards the production rhetorical engagement and subversion of masculinities in twelve different musical case studies In other disciplines within the arts and humanities men s studies is a well established field Musicology has only recently begun to address critically music s engagement with masculinity and as a result has sometimes thereby failed to recognize its own discursive misogyny This book does not seek to cover the field comprehensively but rather to explore in detail some of the ways in which musical practices do the cultural work of masculinity The book is structured into three thematic sections effeminate and virile musics and masculinities national masculinities national musics and identities voices discourses Within these themes the book ranges across a number of specific topics late medieval masculinities early modern discourses of music masculinity and medicine Renaissance Italian masculinities eighteenth nineteenth and early twentieth century ideas of creativity gender and canonicity masculinity imperialist and nationalist ideologies in the nineteenth century and constructions of the masculine voice in late nineteenth and twentieth century opera and song While the case studies are methodologically disparate and located in different historical and geographical locations they all share a common conc
