Hearing In Time Hearing In Time:

Hearing in Time Justin London, 2012-05-03 Our sense that a waltz is in three or a blues song is in four with a shuffle comes from our sense of musical meter Hearing in Time explores the metric aspect of our musical experience from a psychological point of view Musical meter is subject to a number of fundamental perceptual and cognitive constraints These constraints are the cornerstones of Hearing in Time s account of musical meter Hearing in Time also takes into account the fact that listening to music like many other rhythmic activities is something that we do a lot It also approaches meter in the context of music as it is actually performed with nuances of timing and dynamics rather than as a theoretical idealization Hearing in Time s approach to meter is not based on any particular musical style or cultural practice and it discusses musical examples from a wide range of musical styles and cultures from Beethoven and Bach to Brubeck and Ghanaian Ewe drumming In taking this broad approach a number of fundamental similarities between a variety of different metric phenomena such as the difference between so called simple versus complex or additive meters become apparent Requiring only a modest ability to read a musical score Hearing in Time is written for musicians musicologists and music theorists as well as psychologists linguists and cognitive scientists who are interested in rhythm and meter Code of Federal
