recent years researchers and practitioners have explored the nature theory and best practices that are required for effective and ethical crisis preparation and response The consequences of being unprepared to respond quickly appropriately and ethically to a crisis are dramatic and well documented For this reason crisis consulting and the development of crisis response plans and protocols have become more than a cottage industry Taking a rhetorical view of crisis events and utterances this book is devoted to adding new insights to the discussion and to describing a rhetorical approach to crisis communication To help set the tone for that description the opening chapter reviews a rhetorical perspective on organizational crisis As such it raises questions and provokes issues more than it addresses and answers them definitively The other chapters can be viewed as a series of experts participating in a panel discussion The challenge to each of the authors is to add depth and breadth of understanding to the analysis of the rhetorical implications of a crisis as well as to the strategies that can be used ethically and responsibly Central to this analysis is the theoretic perspective that crisis response requires rhetorically tailored statements that satisfactorily address the narratives surrounding the crisis which are used by interested parties to define and judge it This volume will be of value to scholars and students interested in crisis communication and is certain to influence future work and research on responding to crises The Handbook of Communication and Corporate Reputation Craig E. Narrative Factuality Monika Fludernik,Marie-Laure Ryan,2019-12-16 The study of narrative the object of the rapidly growing discipline of narratology has been traditionally concerned with the fictional narratives of literature such as novels or short stories But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual In this volume which provides a companion piece to Tobias Klauk and Tilmann K ppe s Fiktionalit t Ein interdisziplinäres Handbuch the use of narrative to convey true and reliable information is systematically explored across media cultures and disciplines as well as in its narratological stylistic philosophical and rhetorical dimensions At a time when the notion of truth has come under attack it is imperative to reaffirm the commitment to facts of certain types of narrative and to examine critically the foundations of this commitment But because it takes a background for a figure to emerge clearly this book will also explore nonfactual types of narratives thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology **Handbook of Public Relations** Robert L.
