Water for Food Security, Nutrition and Social Justice Lyla Mehta,Theib Oweis,Claudia Ringler,Barbara Schreiner,Shiney Varghese,2019-09-19 This book is the first comprehensive effort to bring together Water Food Security and Nutrition FSN in a way that goes beyond the traditional focus on irrigated agriculture Apart from looking at the role of water and sanitation for human well being it proposes alternative and more locally appropriate ways to address complex water management and governance challenges from the local to global levels against a backdrop of growing uncertainties The authors challenge mainstream supply oriented and neo Malthusian visions that argue for the need to increase the land area under irrigation in order to feed the world s growing population Instead they argue for a reframing of the debate concerning production processes waste food consumption and dietary patterns whilst proposing alternative strategies to improve water and land productivity putting the interests of marginalized and disenfranchized groups upfront The book highlights how accessing water for FSN can be challenging for small holders vulnerable and

marginalized women and men and how water allocation systems and reform processes can negatively affect local people's informal rights. The book argues for the need to improve policy coherence across water, land, and food and is original in making a case for strengthening the relationship between the human rights to water and food especially for marginalized women and men. It will be of great interest to practitioners, students, and researchers working on water and food issues.

Aboelmakarem Farag, Samaa Badawi, Gurbinder Lalli, Maya Kamareddine, 2021-11-28. This book highlights the potential of school farms to fight hunger and malnutrition by providing access to locally produced fresh and healthy food as well as providing young students with educational opportunities to learn, interact with nature, and develop their skills. Hunger is one of the most pressing concerns we face today, and there is a clear need to provide alternative sources of food to feed a fast-growing population. School farms offer a sustainable opportunity to produce food locally in order to feed underprivileged students who rely on school meals as an integral part of their daily diet. Approaching the concept of school farms through four themes: Problem, People, Process, and Place, the book shows how they can play an essential role in providing sustainable and healthy food for students, the critical role educational institutions can play in promoting this process, and the positive impact hands-on farming can have on students' mental and physical wellbeing. Utilizing the authors' personal hands-on experiences and drawing on global case studies, the book provides a theoretical framework and practical guidance to help with the establishment of school farms and community-based gardening projects and an education system which promotes a sustainable and healthy approach to food, agriculture, and the environment. This book will be essential reading for students and scholars of food security, agriculture, healthy and sustainable diets, education for sustainable development, and urban studies. It will also be of great interest to practitioners and policymakers involved in food policy, developing school and community projects, global health, and international development, as well as education professionals. *Beijing* Qian Guo, 2020-03-17.
