In recent years historians across the world have become increasingly interested in transnational and global approaches to the past However the debates surrounding this new border crossing movement have remained limited in scope as theoretical exchanges on the tasks responsibilities and potentials of global history have been largely confined to national or regional academic communities In this groundbreaking book Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows sociologies of knowledge and hierarchies that are an intrinsic part of historical practice Taking the United States Germany and China as his main case studies he reflects upon the character of different approaches to global history as well as their social political and cultural contexts He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue cooperation and exchange

Using The Human Record, Sources of Global History, Fourth Edition, Volumes I and II Alfred J. Andrea, 2001. **Discipline Problems** Tadashi Dozono, 2024-05-07. Angel, a Black tenth grader at a New York City public school, self-identifies as a nerd and likes to learn. But she's troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas, presenting a sugar-coated image of the United States that is at odds with her everyday experience. The history I learned in school is simpler, she says. The world I live in is a lot more complex. Angel, like every student interviewed in *Discipline Problems*, has been identified by teachers as a troublemaker, a student whose behavior disrupts classroom norms and interferes with instruction. But her critiques of the curriculum she's taught speak to her curiosity and insight, crucial foundations for understanding history. Like many students who have been marginalized by systemic racism in American schools, she exposes the shortcomings of her classrooms' academic environments by challenging both the content and the methods of her education. All too often these challenges are framed as troublemaking, and the students are disciplined for acting out instead of being rewarded for their intellectual engagement. Tadashi Dozono, a professor of education and former high school social studies teacher, takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum. He reinterprets troublemaking, usually cast as a behavioral deficit, as an intellectual asset and a form of reasoning that challenges the disciplining reason of classrooms where whiteness is

valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners Classroom Management in Teacher Education Programs Jonathan Ryan Davis,2017-09-22 This book investigates the impact of integrating culturally relevant and pedagogically dynamic classroom management strategies into the curriculum of an urban secondary education pre service methods course The book begins by framing the problem of integrating classroom management into the lives of those learning to teach impact It then examines multiple case studies of students from the study s control cohort who did not have classroom management coursework in their methods course After breaking down the challenges encountered by the control students the book offers DCMA as a framework from which teacher educators might create an integrative methods course The book then analyzes students from the study s experimental cohort and how they benefited from such an integrative course throughout their teacher preparation and into their first year of teaching **Culture, Society & Globalization: The History of Globalization Gr. 5-8** Erika Gombatz-Gasper,2016-08-01 This is the chapter slice The History of Globalization Gr 5 8 from the full lesson plan Culture Society Globalization Help students make informed decisions about civil matters and lifestyle choices that affect themselves and the world Our resource provides students with the building blocks to understand the debates and issues surrounding globalization Go back in time to experience the influence of the Ottoman Empire on the greater world Debate the pros and cons of globalization in today s world Conduct a survey at your school to find out whether mother languages are being passed down to current generations Explore the negative impacts of the spread of Western culture to the rest of the world Plan international vacations for people that minimize the negative impacts of tourist activity on indigenous and local populations Find out how globalization can cause the spread of infectious diseases to occur more quickly Watch the world come together to deal with the global issue of Climate Change Represent a nation during a United Nations meeting to draft additions to human rights law Aligned to your State Standards and written to Bloom s Taxonomy additional hands on activities crossword word search comprehension quiz and answer key are also included **Reviewing Global History and Geography** Henry Brun,2000-03-15 This book is intended to serve as an intensive review to prepare students to master the mandated New York State Regents examination **A Global History of the Nuclear Arms Race** Richard Dean Burns,Joseph M. themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime *Anthropology and Global History* Robert M. Carmack, 2013-10-11 Anthropology and Global History explains the origin and development of human societies and cultures from their earliest beginnings to the present utilizing an anthropological lens but also drawing from sociology economics political science history and ecological and religious studies Carmack reconceptualizes world history from a global perspective by employing the expansive concepts of world systems and civilizations and by paying deeper attention to the role of tribal and native peoples within this history Rather than concentrating on the minute details of specific great events in global history he shifts our focus to the broad social and cultural contexts in which they occurred Carmack traces the emergence of ancient kingdoms and the characteristics of pre modern empires as well as the processes by which the modern world has become integrated and transformed The book addresses Western civilization as well as comparative processes which have unfolded in Asia the Middle East Latin America and sub Saharan Africa Vignettes opening each chapter and case studies integrated throughout the text illustrate the numerous and often extremely complex historical processes which have operated through time and across local regional and global settings Teaching Recent Global History Diana B. Turk, Laura J. Dull, Robert Cohen, Michael R.
