In this report, he introduces readers to the 3-D printing marketplace, covering such topics as: How fused deposition modeling (FDM) printing works; Basic terminology such as build plate, spool, nozzle, hot end, direct extruder, and Bowden extruder; Plastics used such as ABS, PLA, and others; Descriptions, price ranges, and filament specs for 3-D printers from MakerBot, Printbot, Solidoodle, and other manufacturers; Suggested staff skills for performing basic maintenance tasks; Where to find both ready-to-use designs and the software for customizing from beginning to advanced systems.

Proceedings of the 2nd UPY International Conference on Education and Social Science (UPINCESS 2023) Ari Kusuma Wardana, 2023-12-31. This is an open access book. Technology has had a huge impact on education and social dynamics around the world. Since the introduction of information and communication technologies (ICTs) such as the internet, smartphones, and social media, much has changed in the way we learn and interact with others. In education, technology has enabled students and teachers to access more diverse and engaging educational resources. With internet access, students and teachers can access educational resources from all over the world and learn about various topics and disciplines. In addition, technology also enables distance learning, which allows students and teachers to connect from different locations. However, there are also negative impacts of using technology in education. For example, excessive use of social media and the internet can cause concentration disorders and addiction in students. In addition, too much reliance on technology can also reduce students' ability to think critically and solve problems independently. In social dynamics, technology has allowed us to connect with people from all over the world and paved the way for greater collaboration and cultural exchange. However, technology has also brought negative impacts on social dynamics, such as the spread of fake news or hoaxes, cyberbullying, and social media addiction. In this regard, technology can be a very useful tool if used wisely and with proper understanding of its impact. Therefore, to support this, Universitas PGRI Yogyakarta held an international conference and Call for Papers: The 2nd UPY International Conference on Education and Social Science (UPINCESS). The Impact of Technology on Education and Social Dynamics, on September 27, 2023. The conference aims to discuss in depth about the impact of technology on education and social dynamics, as well as finding appropriate solutions and strategies to minimize its negative impact and

maximize its benefits Experts researchers and practitioners in the field of education and technology from around the world can share their knowledge and experience in this conference and can encourage collaboration and innovation in this field

Durée as Einstein-in-the-Heart Candice Lee Kent,2024-03-29 Durée as Einstein in the Heart traces the trajectory of modernist interaction with Bergson and Einstein through the works of Virginia Woolf 1882 1941 and Mary Butts 1890 1937 It presents an overview of critical approaches that focus on time in Woolf's novels and that foreground Bergson in their analyses of Woolf It then examines how Woolf's formal experimentation and theorisation of time in *Jacob's Room* 1922 and *Mrs Dalloway* 1925 relates to Bergson's temporal theories This is followed by a discussion on the role Bergson's thinking played in the early formulation of Butts's ideas of time and an analysis of how Bergson's ideas emerge in the short story *Angele au Couvent* 1923 concluding by highlighting points of contrast in the engagements of Woolf and Butts The book then documents the growth of

Butts's interest in Einstein's ideas and shows how she amalgamates these with Bergson's thinking in her journals and in the most intense of her fictional engagement with Einstein's ideas the novel *Death of Felicity Taverner* 1932 It discusses Butts's responses to the popular science genre and examines the important role played by J W N Sullivan and Arthur Eddington in the development of her understanding and interpretation of physics It concludes with a discussion of Butts's antisemitic characterisation of Kralin as purveyor of corrupted science in contrast with the Taverners who are conscious of *dur e* and delight in the abstractions of scientific truth *Towards Radical Regeneration* Christoph Gengnagel, Olivier
