Percival, 2022-03-01. From a vital new voice in food ethics comes a smart nuanced investigation into the current meat debate. Our future diet will be shaped by diverse forces. It will be shaped by novel technologies, by geopolitical tensions and the evolution of cultural preferences, by shocks to the status quo, pandemics and economic strife, the escalation of the climate and ecological crises and by how we choose to respond. It will also be shaped by our emotions. It will be shaped by the meat paradox. Should we eat animals? was until recently a question reserved for moral philosophers and an ethically minded minority, but it is now posed on restaurant menus and supermarket shelves, on social media and morning television. The recent surge in popularity for veganism in the UK, Europe and North America has created a rupture in the rites and rituals of meat, challenging the cultural narratives that sustain our omnivory. In *The Meat Paradox*, Rob Percival, an expert in the politics of meat, searches for the evolutionary origins of the meat paradox, asking when our relationship with meat first became emotionally and ethically complicated. Every society must eat, and meat provides an important source of nutrients. But every society is moved by its empathy. We must all find a way of balancing competing and contradictory imperatives. This new book is essential reading for anyone interested in the origins of our empathy, the psychology of our dietary choices, and anyone who has wondered whether they should or shouldn't eat meat. **Ultra-Processed People** Chris van Tulleken, 2024-05-07. THE 1

INTERNATIONAL BESTSELLER. Finalist for the Baillie Gifford Prize for Non-fiction. An eye-opening investigation into the science, economics, history and production of ultra-processed food, now with a new Afterword by the author. Named a Best Book of the Year by NPR, The Economist, The Times, The New Yorker, Smithsonian, Daily Mail, The Guardian, Financial Times and more. It's not you, it's the food. How much of our daily caloric intake comes from ingesting substances that, technically speaking, do not meet traditional definitions of food? Chances are, if you're eating something that came wrapped in plastic and contains a funky ingredient you don't have in your kitchen, it's most likely almost definitely ultra-processed food, or UPF. More than the principal obstacle to eating right, UPF has been linked to metabolic disease, depression, inflammation, anxiety and cancer, while the production, distribution and disposal of UPF and related products globally is known to cause devastating environmental damage. At the same time, UPF represents the dominant, nigh-unavoidable food culture for millions upon millions of eaters. Medical doctor and broadcaster Chris van Tulleken has spent his career trying to reframe the conversation

around eating right balancing the hard and sometimes shocking facts about what we're putting into our bodies with empathy for the natural desire to keep eating what we like have time for and can afford As he argues in this book we are all participants in an experiment we didn't consent to one to determine how to get us to buy as much ultra processed food as possible It's not as simple as stumbling across the right diet trend finding time to meal plan or avoiding over indulging in sugar fat or carbs or any other culprit Nor is it a matter of individual will It's about learning to live in the third age of eating defined by the overwhelming abundance of ultra processed eating options and arming yourself with the simple and not so simple facts that will help you make the choices that are right for you Global Marketing Strategy Bodo B.
