Gaines, Ian Loftus, 2013-06-20 Vascular and Endovascular Surgery meets the needs of surgeons in higher training and practising consultants for a contemporary and evidence based account of this subspecialty that is relevant to their general surgical practice It is a practical reference source incorporating the most current information on recent developments management issues and operative procedures The text is thoroughly referenced and supported by evidence based recommendations wherever possible distinguishing between strong evidence to support a conclusion and evidence suggesting that a recommendation can be reached on the balance of probabilities This is a title in the Companion to Specialist Surgical Practice series whose eight volumes are an established and highly regarded source of information for the specialist general surgeon The Companion to Specialist Surgical Practice series provides a current and concise summary of the key topics within each major surgical subspecialty Each volume highlights evidence based practice both in the text and within the extensive list of references at the end of every chapter An expanded authorship team across the series includes additional European and World experts with an increased emphasis on global practice The contents of the series have been extensively revised in line with recently published evidence The revision of the content reflects the continued move towards non invasive imaging medical therapy and endovascular techniques culminating in a new chapter on Future Developments Many of the chapters reflect the collaborative nature of a modern vascular service and are co authored by a vascular surgeon and a vascular radiologist The authorship team has been expanded with input from vascular nursing and rehabilitation experts Vascular Surgery George Geroulakos, Hero van Urk, Robert W. Hobson II, Keith D. Calligaro, 2013-11-11 This book is rather unique among textbooks in vascular surgery Most cover the surgical management of vascular diseases in whole or in part in standard textbook fashion with the text organized to cover the topics methodically in

a didactic manner and supported by tables illustrations and references Others have special purposes such as atlases on technique or algorithm based books on decision making All have their place but if the educational goals are training of the young surgeon self assessment and continuing medical education for the practitioner or preparation for oral examination this book fills a special need and fills it very well by breaking away from the didactic approach It has long been recognized by educators that retention of knowledge i e true learning are much better achieved using the Socratic method of questions and answers as opposed to simply reading or being told facts In this book this approach is developed and presented in a very effective manner In each chapter one is presented with a case report representing a real life scenario The case reports scenarios in this book together cover most of vascular surgery experience
