Salmon, Todd K. Shackelford, 2007-09-14 In this volume leading theorists and researchers illustrate the ways in which an evolutionary perspective can inform our study and understanding of the interactions we group into the category of family relationships Although some researchers in social psychology appreciate the importance of understanding familial relationships the majority have suffered from a lack of attention to the qualitatively distinct types of close relationships found within the designation of family Family psychology is relationship specific In other words humans have evolved specialized mechanisms for processing information and motivating behavior that deal with the distinct demands of being a mate father mother sibling child or grandparent Such an evolutionary perspective on family dynamics can provide insight into our behavior in a way that no other perspective provides The volume will be of interest to academic researchers
