Going With The Grain Making Chairs In The 21st Century 2nd Edition:

Going with the Grain Mike Abbott,2013-11 This book is about how to make a chair simply and with tools you can easily obtain or construct for yourself In 1985 when Mike Abbott started running courses using the traditional tools and techniques of the Victorian chair bodgers many people said it was about time he moved into the 20th Century Following the success of his first two books Green Woodwork and Living Wood Mike s third book shows that he has now moved happily and unashamedly straight into the 21st Century With the help of over 600 colour photographs he guides you step by step through The tools and techniques needed for cleaving shaping and assembling a chair Constructing a few simply homemade devices to aid the process Making 3 stools and 3 chairs each with its own unique character Going with the Grain is not written for cabinet makers although they are welcome to read it too the techniques described in this book have as much in common with cabinet making as does a jacket potato with haute cuisine It is written for anyone who shares Mike s passion for trees and wood and is interested in getting to know them better through the fulfilling process of turning a tree into their very own chair This new second edition has been revised based on feedback from readers and students in Mike s courses Sections on drilling and steam bending have been updated and all measurements are now given in inches as well as in metric units The major changes are in the large chapter on seat weaving which now includes detailed instructions for three different patterns in Danish cord and fiber rush There are also illustrations of over 20 variations in these and in other materials many of which have never been published before

Literacies for the 21st Century Donald J. Leu,Charles K. Kinzer,Kathleen A. Hinchman,1996 The Englishman's Chair John Gloag,2022-10-24 Originally published in 1964 The Englishman s Chair is a history of English chairs written as a continuous story from the 15th to the 20th Century and because of the revealing powers inherent in chair making and design it is also an unconventional footnote to English social history The changes in taste and fashion the increase of skill the introduction of new materials and the long battle between dignity and comfort are discussed as is the impact that modern industrial designers have had on chair design
