Mortal Coil Fay Bound Alberti, 2016-04-08 To many people the idea that the body has its own history might sound faintly ridiculous. The body and its experiences are usually seen as something that we share with people from the past. Like human nature, it represents the unchanging in a changing world. Bodies just are. But the body does have a history. The way that it moves, feels, breathes, and engages with the world has been viewed very differently across times and cultures. For centuries we were believed to be composed of souls that were part of the body and inseparable from it. Now we exist in our heads and our bodies have become the vessels for that uncertain and elusive thing we call our true selves. The way we understand the material structure of the body has also changed radically over the centuries. From the bones to the skin, from the senses to the organs of sexual reproduction, every part of the body has an ever-changing history dependent on time, culture, and place. This *Mortal Coil* is an exploration of that history. Peeling away our assumptions about the unchanging nature of the human body, Fay Bound Alberti takes it apart in order to put it back anew, telling the cultural history of our key organs and systems from the inside out, from blood to guts, brains to sex organs. The understanding of the modern body she reveals in the process is far removed from the eternal or timeless object of common assumption. In fact, she argues, its roots go back no further than the sixteenth century at the earliest, and it has only truly existed in its current form since the nineteenth century. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), **The British National Bibliography** Arthur James Wells, 2005 **Current Catalog** National Library of Medicine (U.S.), First multi-year cumulation covers six years 1965-70 *Lifestyle Psychiatry: Investigating Health Behaviours for Mental Well-Being* Joseph Firth, Philip B. Ward, Brendon Stubbs, 2019-10-18 Recent years have seen a substantial increase in both academic and clinical interest around how lifestyle behaviors such as exercise, sleep, and diet can influence mental health. The aim of this Research Topic is to produce a novel body of work contributing towards the field of Lifestyle Psychiatry, i.e. the use of lifestyle interventions in the treatment of mental disorders. In this way, the Research Topic aims to present important behavioral targets for lifestyle modification in public health and/or clinical settings and to examine the efficacy and implementation of lifestyle interventions for people with mental health conditions. Collectively, this research presented within this Research Topic can increase understanding and inform evidence-based practice of Lifestyle Psychiatry while providing clear directions for future research required to take the field forward.
