## Hacking Your Education:

**Hacking Your Education** Dale J. Stephens, 2013-03-05 It's no secret that college doesn't prepare students for the real world. Student loan debt recently eclipsed credit card debt for the first time in history and now tops one trillion dollars. And the throngs of unemployed graduates chasing the same jobs makes us wonder whether there's a better way to make it in today's marketplace. There is, and Dale Stephens is proof of that. In *Hacking Your Education*, Stephens speaks to a new culture of hackademics who think college diplomas are antiquated. Stephens shows how he and dozens of others have hacked their education and how you can too. You don't need to be a genius or especially motivated to succeed outside school. The real requirements are much simpler: curiosity, confidence, and grit. *Hacking Your Education* offers valuable advice to current students as well as those who decided to skip college. Stephens teaches you to create opportunities for yourself and design your curriculum inside or outside the classroom. Whether your dream is to travel the world, build a startup, or climb the corporate ladder, Stephens proves you can do it now rather than waiting for life to start after graduation day.

**Hack Your Education** Jonathan Fritzler, 2015 Hack Your Education is the ultimate tool for any student who aspires to make their passion their profession and doesn't want to wait until they graduate to get started cultivating their dreams. Jonathan Fritzler spent years going through the motions of going to school with the goal to graduate so he could begin his real life. Finally, an epiphany hit him like a truck: literally. On his way to school, he was struck by a truck on his moped and was nearly killed. During his recovery, he began to reevaluate his purpose in life and ultimately the purpose of his education. He began focusing his school projects toward developing a business plan for an organization called the Aloha Movement Project, which led him to getting funding to build a million-dollar recording studio in Hawaii. These projects led him to a deep awareness of how powerful Education Energy really is. Now students and community leaders can experience the Education Energy revolution in their own lives. With Education Energy, homework becomes building blocks, teachers become mentors, and the school campus becomes an incubator for students' passions to become real-world initiatives. Do not waste any more school projects. Harness your Education Energy as a Renewable Resource. Special thanks to contributing authors Shante Stuart and Jaimy Baek and all the AMPtivists who contributed so much research and support to our non-profit.

**Alternative Universities** David J. Staley,2019-03-26 Imagining the universities of the future How can we re envision the university Too many examples of what passes for educational innovation today MOOCs especially focus on transactions on questions of delivery In Alternative Universities David J Staley argues that modern universities suffer from a poverty of imagination about how to reinvent themselves Anyone seeking innovation in higher education today should concentrate

instead he says on the kind of transformational experience universities enact In this exercise in speculative design Staley proposes ten models of innovation in higher education that expand our ideas of the structure and scope of the university suggesting possibilities for what its future might look like What if the university were designed around a curriculum of seven broad cognitive skills or as a series of global gap year experiences What if as a condition of matriculation students had to major in three disparate subjects What if the university placed the pursuit of play well above the acquisition and production of knowledge By asking bold What if questions Staley assumes that the university is always in a state of becoming and that there is not one idea of the university to which all institutions must aspire This book specifically addresses those engaged in university strategy university presidents faculty policy experts legislators foundations and entrepreneurs those involved in what Simon Marginson calls university making Pairing a critique tempered to our current moment with an explanation of how change and disruption might contribute to a new golden age for higher education *Alternative Universities* is an audacious and essential read

**Disrupting the Digital Humanities** Dorothy Kim, Jesse Stommel, 2018 All too often defining a discipline becomes more an exercise of exclusion than inclusion *Disrupting the Digital Humanities* seeks to rethink how we map disciplinary terrain by directly confronting the gatekeeping impulse of many other so called field defining collections What is most beautiful about the work of the Digital Humanities is exactly the fact that it can't be tidily anthologized In fact the desire to neatly define the Digital Humanities to filter the DH y from the DH is a way of excluding the radically diverse work that actually constitutes the field This collection then works to push and prod at the edges of the Digital Humanities to open the Digital Humanities rather than close it down Ultimately it's exactly the fringes the outliers that make the Digital Humanities both lovely and rigorous This collection does not constitute yet another reservoir for the new Digital Humanities canon Rather our aim is less about assembling content as it is about creating new conversations Building a truly communal space for the digital humanities requires that we all approach that space with a commitment to 1 creating open and non hierarchical dialogues 2 championing non traditional work that might not otherwise be recognized through conventional scholarly channels 3 amplifying marginalized voices 4 advocating for students and learners and 5 sharing generously to support the work of our peers
