

Secure Protected Health Information and Support HIPAA Compliance

Virtru's end-to-end encryption, security settings, granular access controls, identity authentication, and one-click secure patient access helps you meet compliance and go beyond it to meet your duty to protect sensitive data.

HIPAA Data Security Requirements

The Health Insurance Portability and Accountability Act (HIPAA) includes a Security Rule to protect how electronic PHI (ePHI) is created, received, used, or maintained. The Security Rule includes required and addressable safeguards to maintain the integrity, availability, and confidentiality of ePHI, such as:

- ePHI – whether at rest or in transit – must be encrypted to NIST standards once it travels beyond internal firewalled servers and render data unreadable and unusable if a breach occurs.
- Use activity logs and audit controls to register attempted access to ePHI.
- Empower employees to be secure, train on procedures governing access to ePHI, and help prevent human error.

Unlike solutions using TLS encryption that only encrypts data in transit, Virtru protects data from creation to storage to internal and external sharing. Virtru uses encryption algorithms that comply with FIPS 140-2, is FedRAMP authorized at the moderate impact level, and adheres to the security controls defined by NIST SP 800-53. Virtru cannot access your protected data at any time.

Virtru is a Crucial Part of Your Solution to Help Meet HIPAA Compliance

End-to-End Encryption

Protect data throughout its lifecycle, require authentication or share data directly with patients via one-click secure access, and go beyond email to encrypt data in Google Drive and SFDG apps.

Maintain Data Visibility

Use Virtru's Control Center and audit logs to see who has attempted to access data at any point in time, track where your data travels, and take action to reduce/ mitigate breaches.

On-Demand Access Controls

Revoke access and adjust access controls to maintain complete ownership over your data. Only encrypt data that needs to be protected with our HIPAA DLP rule pack and create your own rules.
