The 36th World Congress of Audiology WCA in 2024 marks a significant milestone in the field of audiology. Over nearly half a century, this event has returned to France, bringing together audiologists, researchers, and experts from across the globe. Audiology, the study of hearing, tinnitus, and vestibular disorders, has undergone remarkable transformations in recent times. With the support of the 36th WCA organizing committee, Frontiers has created a comprehensive Research Topic to coincide with the congress scientific program. The primary goal of the WCA 2024 and this Research Topic is to provide a comprehensive perspective on the most pressing issues in audiology today. This will delve into the dynamic evolution of audiology, exploring topics ranging from Teleaudiology to the integration of Artificial Intelligence. Our aim is to dissect the intricate facets of Hearing Aid delivery and Audiological services on a global scale, emphasizing the pivotal role of Evidence Based audiology. Specifically, three themes have been selected for roundtable discussions: Hearing and cognition, Hearing and neurodevelopmental disorders, and Ototoxicity. These themes will facilitate enriching dialogues with esteemed opinion leaders in these respective domains. Life Care Planning and Case Management Across the Lifespan Tanya Rutherford-Owen, Mary Barros-Bailey, Roger O. Weed, 2023-11-23

Celebrating 25 years since its first publication, the fifth edition of this best-selling text is the most up-to-date and complete resource available on what a life care planner does, how the life care planner does it, and issues that affect the day-to-day role of a life care planner. Now featuring new material on pediatric life care planning and case management, including brachial plexus injuries and neurodevelopmental disorders, this new edition provides guidance and planning for cases across the lifespan. It begins with a series of chapters examining ten different professional specializations that often contribute to a life care plan, before providing critical information for developing life care plans for individuals with different physical, mental, and cognitive conditions, including spinal cord injury, brain injury, and chronic pain. Uniquely comprehensive, the book also includes chapters on the forensic and legal context of life care planning, as well as equipment, technology, evidence-based literature resources, and special education special needs planning relevant to pediatric life care planning. Also including chapters dedicated to life care planning methodology and life care planning research, this is an essential resource for anyone practicing or studying life care planning or managing the needs of those requiring chronic medical care over the lifespan. **Marketing in an Audiology Practice** Brian Taylor, 2015-04-01

Marketing in an Audiology Practice provides a unique in-depth look into all facets of marketing and is a must-have for audiologists looking to

market themselves and grow their business It demonstrates how marketing and branding are instrumental to the long term sustainability of an audiology or hearing instrument dispensing practice It is written for two audiences graduate students who often do not get enough exposure to business related coursework during their graduate school tenure and experienced audiologists who are looking for some material of a practical nature This practical text strives to further the autonomy of the profession by presenting an A to Z approach for creating and implementing marketing plans and budgets in both for profit and not for profit settings Additionally a key focus of this text is how to incorporate new and emerging social media tools as part of a comprehensive marketing strategy to appeal to a broader patient base The Hearing Professional ,2006
