Heartsblood Hunting Spirituality And Wildness In America:

Heartsblood David Petersen, 2003-08 In *Heartsblood* nationally acclaimed nature writer and veteran outdoorsman David Petersen draws clear distinctions between true hunting and contemporary hunter behavior praising what's right about the former and damning what's wrong with the latter as he seeks to render the terms hunter and anti hunter palpable

Epiphany in the Wilderness Karen R. Jones, 2016-01-02 Whether fulfilling subsistence needs or featured in stories of grand adventure hunting loomed large in the material and the imagined landscape of the nineteenth century West. *Epiphany in the Wilderness* explores the social, political, economic and environmental dynamics of hunting on the frontier in three acts using performance as a trail guide and focusing on the production of a cultural ecology of the chase in literature, art, photography and taxidermy. Using the metaphor of the theater Jones argues that the West was a crucial stage that framed the performance of the American character as an independent, resourceful, resilient and rugged individual. The leading actor was the all conquering masculine hunter hero the sharpshooting man of the wilderness who tamed and claimed the West with each provident step. Women were also a significant part of the story treading the game trails as plucky adventurers and resilient homesteaders and acting out their exploits in autobiographical accounts and stage shows. *Epiphany in the Wilderness* informs various academic debates surrounding the frontier period including the construction of nature as a site of personal challenge, gun culture, gender adaptations and the crafting of the masculine wilderness hero figure, wildlife management and consumption, memorializing and trophy taking and the juxtaposition of a closing frontier with an emerging conservation movement

Hunting and the Ivory Tower Douglas Higbee, David Bruzina, 2018-05-11 Seventeen hunter scholars explore the hunting experience and question common negative stereotypes. Despite the academy having a reputation for supporting broad and open inquiry in scholarship, some academics have not extended this open minded support to colleagues' personal pursuits. A variety of scholars enjoy hunting which has been stereotyped by some as an activity of the unsophisticated. In *Hunting and the Ivory Tower* Douglas Higbee and David Bruzina present essays by seventeen hunter scholars who explore the hunting experience and question negative assumptions about hunting made by intellectuals and academics who do not hunt. Higbee and Bruzina suspect most academics' understanding of hunting is based on brief television news reports of hunter politicians and commercials for reality TV shows such as *Duck Dynasty*. The editors contend that few scholars appreciate the complexities of hunting or give much thought to its ethical, ecological and cultural ramifications.

Through this anthology they hope to start a conversation about both hunting and academia and how they relate. The contributors to this anthology are academics from a variety of disciplines each with firsthand hunting experience. Their essays vary in style and tone from the scholarly to the personal and represent the different ways in which scholars engage with their avocation. The essays are grouped into three sections: the first focuses on the often fraught relation between hunters and academic culture; the second section offers personal accounts of hunting by academics; and the third portrays hunting from an explicitly academic point of view, whether in terms of value theory, metaphysics, or history. Combined, these essays render hunting as a culturally rich, deeply personal, and intellectually satisfying experience worthy of further discussion. A foreword is provided by Robert DeMott, the Edwin and Ruth Kennedy Distinguished Professor at Ohio University in Athens, Ohio. He is a teacher, writer, critic, and internationally respected expert on novelist John Steinbeck.

Trophy Hunting Nikolaj Bichel, Adam Hart, 2023-04-11. This book gets to the heart of trophy hunting, unpacking and explaining its multiple facets and controversies, and exploring why it divides environmentalists, the hunting community, and the public. Bichel and Hart provide the first interdisciplinary and comprehensive approach to the study of trophy hunting, investigating the history of trophy hunting and delving into the background, identity, and motivation of trophy hunters. They also explore the role of social media and anthropomorphism in shaping trophy hunting discourse, as well as the viability of trophy hunting as a wildlife management tool, the ideals of fair chase and sportsmanship, and what hunting trophies are, both literally and in terms of their symbolic value to hunters and non-hunters. The analyses and discussions are underpinned by a consideration of the complex moral and practical conflicts between animal rights and conservation paradigms. This book appeals to scholars in environmental philosophy, conservation, and environmental studies, as well as hunters, hunting opponents, wildlife management practitioners, and policymakers, and anyone with a broad interest in human-wildlife relations.

Wild Games Dennis Ray Cutchins, Eric Alden Eliason, 2009. Humans understand at least some of what it means to be human, both literally and figuratively, in reference to wild animals. Our relationships with wildlife have traditionally been expressed in terms of hunting; more recently, these relationships have also been manifest as efforts to prevent hunting. Hunting and fishing traditions are, in fact, under fire by critics at the same time that they are receding of their own accord, perhaps becoming even more endangered than any of the pursued animals. These traditions form the major focus of *Wild Games*, a new collection of essays that looks at the folklore and culture of various hunting and fishing practices, documenting the central importance of hunting to many rural societies even in modern times. Editors Dennis Cutchins and Eric Eliason contend that hunters often don't perceive of themselves as separate from the wild but rather identify strongly with a natural order integrated with, rather than standing apart from, the fluctuation of ecosystems. And they frequently don't see wild animals as set apart but understand them as food sources, competitors, friendly rivals, and even equals. Featuring contributions from a variety of distinguished scholars and writers, including an essay by the noted folklorist Simon Bronner on the culture of the deer camp, a fascinating

account of coyote tracking by Eric Eliason and an examination of the role of gender in outdoor life by Diane Humphrey Lueck this book shows how the traditions of hunting and fishing tend to bind hunter and prey into ancient patterns that often defy contemporary culture Book Jacket **Thinking Like a Watershed** Jack Loeffler,Celestia Loeffler,2012-10-15 Thinking Like a Watershed points our understanding of our relationship to the land in new directions It is shaped by the bioregional visions of the great explorer John Wesley Powell who articulated the notion that the arid American West should be seen as a mosaic of watersheds and the pioneering ecologist Aldo Leopold who put forward the concept of bringing conscience to bear within the realm of the land ethic Produced in conjunction with the documentary radio series entitled Watersheds as Commons this book comprises essays and interviews from a diverse group of southwesterners including members of Tewa Tohono O odham Hopi Navajo Hispano and Anglo cultures Their varied cultural perspectives are shaped by consciousness and resilience through having successfully endured the aridity and harshness of southwestern environments over time Hunting - Philosophy for Everyone Nathan Kowalsky,2010-08-16 Hunting Philosophy for Everyone presents a collection of readings from academics and non academics alike that move beyond the ethical justification of hunting to investigate less traditional topics and offer fresh perspectives on why we hunt The only recent book to explicitly examine the philosophical issues surrounding hunting Shatters many of the stereotypes about hunting forcing us to rethink the topic Features contributions from a wide range of academic and non academic sources including both hunters and non hunters **On Hunting** Lt. Col. Dave Grossman,Linda K. Miller,Capt. Keith A. Cunningham,2023-03-07 Hunting is our heritage our heart and our future Where does hunting fit in the modern world To many it can seem outdated or even cruel but as On Hunting affirms hunting is holistic honest and continually relevant Authors Grossman Miller and Cunningham dive deep into the ancient past of hunting and examine its position today demonstrating that we cannot understand humanity without first understanding hunting Readers will discover how hunting formed us examine hunting ethics and their adaptation to modernity understand the challenges traditions and reverence of today s hunter identify hunting skills and their many applications outside the field learn why hunting is critical to ecological restoration and preservation and gain inspiration to share hunting with others Drawing from ecology philosophy and anthropology and sprinkled with campfire stories this wide ranging examination has rich depths for both nonhunters and hunters alike On Hunting shows that we need hunting still and so does the wild earth we inhabit **So Great Was the Slaughter** Buckley T. Foster,2025 By 1925 market hunters had harvested almost every deer bear turkey and quail population in the state of Arkansas having completely eradicated bison the prairie chicken and the passenger pigeon The national demand for meat and the ability to transport meat to cities like Memphis Chicago Cincinnati New Orleans and St Louis had driven many wild species near or to extinction In So Great Was the Slaughter Buck Foster gives an account of the rise of sportsmen and other conservation groups who successfully rallied to end market hunting and create a sustainable legal framework for managing wildlife The Larder John T. Edge,Elizabeth S. D. Engelhardt,Ted

Ownby,2013-10-15 The sixteen essays in *The Larder* argue that the study of food does not simply help us understand more about what we eat and the foodways we embrace The methods and strategies herein help scholars use food and foodways as lenses to examine human experience The resulting conversations provoke a deeper understanding of our overlapping historically situated and evolving cultures and societies The Larder presents some of the most influential scholars in the discipline today from established authorities such as Psyche Williams Forson to emerging thinkers such as Rien T Fertel writing on subjects as varied as hunting farming and marketing as well as examining restaurants iconic dishes and cookbooks Editors John T Edge Elizabeth Engelhardt and Ted Ownby bring together essays that demonstrate that food studies scholarship as practiced in the American South sets methodological standards for the discipline The essayists ask questions about gender race and ethnicity as they explore issues of identity and authenticity And they offer new ways to think about material culture technology and the business of food The Larder is not driven by nostalgia Reading such a collection of essays may not encourage food metaphors It s not a feast not a gumbo certainly not a home cooked meal Ted Ownby argues in his closing essay Instead it s a healthy step in the right direction taken by the leading scholars in the field Avatar and Nature Spirituality

Bron Taylor,2013-08-14 *Avatar and Nature Spirituality* explores the cultural and religious significance of James Cameron s film *Avatar* 2010 one of the most commercially successful motion pictures of all time Its success was due in no small measure to the beauty of the Pandora landscape and the dramatic heart wrenching plight of its nature venerating inhabitants To some audience members the film was inspirational leading them to express affinity with the film s message of ecological interdependence and animistic spirituality Some were moved to support the efforts of indigenous peoples who were metaphorically and sympathetically depicted in the film to protect their cultures and environments To others the film was politically ethically or spiritually dangerous Indeed the global reception to the film was intense contested and often confusing To illuminate the film and its reception this book draws on an interdisciplinary team of scholars experts in indigenous traditions religious studies anthropology literature and film and post colonial studies Readers will learn about the cultural and religious trends that gave rise to the film and the reasons these trends are feared resisted and criticized enabling them to wrestle with their own views not only about the film but about the controversy surrounding it Like the film itself *Avatar and Nature Spirituality* provides an opportunity for considering afresh the ongoing struggle to determine how we should live on our home planet and what sorts of political economic and spiritual values and practices would best guide us
