Low Carb Diet For Beginners I Saporì di Algas, 2023-04-18 WHAT IS A KETO DIET A keto diet is well known for being a low carb diet where the body produces ketones in the liver to be used as energy It's referred to as many different names ketogenic diet low carb diet low carb high fat LCHF etc When you eat something high in carbs your body will produce glucose and insulin Glucose is the easiest molecule for your body to convert and use as energy so that it will be chosen over any other energy source Insulin is produced to process the glucose in your bloodstream by taking it around the body Since the glucose is being used as a primary energy your fats are not needed and are therefore stored Typically on a normal higher carbohydrate diet the body will use glucose as the main form of energy By lowering the intake of carbs the body is induced into a state known as ketosis Ketosis is a natural process the body initiates to help us survive when food intake is low During this state we produce ketones which are produced from the breakdown of fats in the liver The end goal of a properly maintained keto diet is to force your body into this metabolic state We don't do this through starvation of calories but starvation of carbohydrates Our bodies are incredibly adaptive to what you put into it when you overload it with fats and take away carbohydrates it will begin to burn ketones as the primary energy source Optimal ketone levels offer many health weight loss physical and mental performance benefits Benefits of a Ketogenic Diet There are numerous benefits that come with being on keto from weight loss and increased energy levels to therapeutic medical applications Most anyone can safely benefit from eating a low carb high fat diet Weight Loss The ketogenic diet essentially uses your body fat as an energy source so there are obvious weight loss benefits On keto your insulin the fat storing hormone levels drop greatly which turns your body into a fat burning machine

Scientifically the ketogenic diet has shown better results compared to low fat and high carb diets even in the long term Many people incorporate MCT Oil into their diet it increases ketone production and fat loss by drinking bulletproof coffee in the morning Control Blood Sugar Keto naturally lowers blood sugar levels due to the type of foods you eat Studies even show that the ketogenic diet is a more effective way to manage and prevent diabetes compared to low calorie diets AND MUCH MORE
